ABOUT ME

Motivated Data Science and AI/ML Engineer with hands-on experience in machine learning, data analysis and model development using Python, TensorFlow, and Scikit-learn. Strong foundation in building predictive models, data preprocessing, and solving real-world challenges.

SKILLS

- Python
- Machine Learning
- Deep Learning, NLP
- Generative AI
- SQL
- Power BI

LIBRARIES

- Pandas
- Numpy
- Sklearn
- TensorFlow
- Matplotlib

TOOLS

- Jupyter
- Visual Studio Code
- AWS SageMaker

WORK EXPERIENCE

Data Science Intern

CodeSpyder Technologies Pvt Ltd– Pune | Feb-Sep 2024

- Data preprocessing using pandas, NumPy, matplotlib, Scikit-learn.
- Develop the machine learning Models
- Evaluate the model's performance using metrics like precision, recall, F1 score.

PROJECTS

Loan Prediction –Machine Learning

- Automate loan eligibility prediction based on customer data using Machine Learning Algorithms like logistic Regression, Random Forest, K-NN.
- Evaluate the models using Precision, Recall, F1-Score metrics

Next Word Prediction

- Developed Next word predicted using recurrent neural networks (RNNs) or transformers, to predict the most likely next word in a sentence based on the context of previous words.

Portfolio Shortlisting App

- Developed a portfolio shortlisting application using Retrieval-Augmented Generation (RAG).
- Designed to efficiently match portfolios to specified criteria, generative AI for enhanced decision-making.

EDUCATION

B.Tech(Computer Science)

DBATU– Lonere, Maharashtra | 2021- 2024
CGPA : 8

Diploma (Information Technology)

MSBTE – Mumbai, Maharashtra | 2018 - 2021
Percentage :89 38%

SSC

Yashwant High School - Karad | March(2018)
Percentage :80%
