TECHNICAL SKILLS

- | | | | |
|-------------------|--------------------------|----------------------|---------------------|
| • Advanced Excel | • SQL | • Power BI Desktop | • Data Cleaning |
| • Pivot Tables | • MySQL | • Power BI Service | • Data Modelling |
| • Power Query | • SQL Joins | • DAX | • Data Reporting |
| • MS Office Suite | • SQL Statements | • Data Visualization | • Data Storytelling |
| • Excel formulas | • Extract Transform Load | • Dashboards | • Python |

WORK EXPERIENCE

Artificial Intelligence Intern Infosys Springboard

08/2024 – 12/2024

- Developed a Streamlit-based application using **Google Generative AI** to generate image descriptions, translate text into multiple languages, and provide **voice synthesis**.
- Delivered over **90% accurate** AI-generated image captions and **multilingual translations** across 7 languages.
- Enhanced user experience by integrating pytsx3 for real-time **text-to-speech** functionality with customizable voices.
- **Technologies Used:** Python, Streamlit, Google Generative AI, Google Translate API, pytsx3.

Data Scientist Intern Evoastra Ventures Pvt Ltd

07/2024 – 8/2024

- Developed an **AI-driven LinkedIn post generator**, achieving 95% accuracy in metadata extraction (topic, length, language) using few-shot learning.
- Built a **backend** with **LangChain** and **Groq API**, generating posts that reduced manual drafting time by over 70%.
- Implemented algorithms for metadata extraction and tag unification, improving categorization consistency by 60%. Delivered over 90% accurate AI-generated image captions and multilingual translations across 7 languages.

PROJECTS

Atliq Grands Hospitality Revenue Insights – Excel, Power Bi

- Conducted an analysis of the revenues and growth of Atliq Grands Hospitality to determine the better pricing patterns for improvement of the vacancy levels.
- Data was therefore gathered through a combination of hotel booking platforms as well as online reviews and market information Crafted Diversity & Inclusion report, harmonizing the workforce based on gender for 500 employees.
- Used excel, power BI and revenue management software to determine demand and pricing strategies.
- Of the strategies include implementing dynamic pricing related to the availability and promotions, which increase the occupancy levels.
- When the recommendations were put into use, the monthly bookings rose by 20% and resulted in an overall rise of the profits by 15%.
- Crafted Power BI reports for analysis & Hotels performance by using Power Query, Charts and DAX for calculations.

HR Attrition Analysis – Excel, Power Bi

- In depth analysis of the tendencies of the employee attrition and the aspects that impact the turnover rates
- HR data was gathered and prepared from various sources HR records of the employees
- Worked with Advanced Excel, Power BI to identify patterns that led to attrition, and to establish their causes
- Upon reviewing the HR Human Resource data, we established that the main reason that led to turnover is work-life balance dissatisfaction and lack of career growth options. And it is with these factors that ensure that the turnover is addressed in order to enhance the issue of employee retention.
- Used Power Query Editor for data cleaning, DAX for measures & visualization with charts, cards, table & filter.

EDUCATION

CSMSS CHH SHAHU COLLEGE OF ENGINEERING, AURANGABAD.

B.Tech in Artificial Intelligence and Data Science (2020-24)

CGPA – 8.03

CERTIFICATIONS

- NPTEL Data Analytics with Python.
- DeepLearning.AI - Supervised Machine Learning: Regression and Classification.
- LinkedIn.Learning: Python for Students
- Simplilearn: Data Science with Python
- AWS Academy : Introduction to Cloud Semester I
