PROFILE

AI and Data Science enthusiast with hands-on experience in ML/DL using Python, TensorFlow, and Scikit-learn. Skilled in Generative AI, NLP, and RAG pipelines with LangChain, FAISS, and Hugging Face. Built agentic AI systems with LangChain and LangGraph and deployed end-to-end solutions using Flask, Django, and Streamlit.

SKILLS

Python | SQL | NumPy | Pandas | Matplotlib | Seaborn | Scikit-learn | TensorFlow | Keras | PyTorch | OpenCV | Hugging Face | Transformers | LangChain | LangGraph | FAISS | RAG Pipelines | NLTK | Flask | Django | Streamlit | FastAPI | HTML | CSS | Web Scraping | Power BI

PROFESSIONAL EXPERIENCE

Data Scientist Intern , CodeSpyder Technologies, Pune

July 2024 – June 2025

- Fine-tuned ML/DL models using TensorFlow & Keras with optimized preprocessing, feature engineering, and hyperparameter tuning. Applied Generative AI for automated text and insight generation.
- Leveraged RAG, embeddings, and LLMs to enhance NLP tasks. Built Agentic AI systems using LangChain and LangGraph for autonomous multi-agent coordination and decision-making.

PROJECTS

Dual-Agent AI Research System using Agentic AI

- Developed a Python-based agentic AI system using LangChain and LangGraph, integrating Tavily for automated web research and Groq for advanced answer generation.
- Built and deployed a responsive Streamlit web interface, delivering real-time, research-backed answers through an intuitive user experience.

Resume Analyzer with LLM & RAG

- Developed a GenAI-powered Resume & JD Matcher web application using Python and Streamlit, enabling automated PDF parsing, skill extraction, and real-time candidate-job fit analysis.
- Built an intelligent backend using Cohere LLMs, FAISS vector search, and regex-based skill extraction, applying RAG to generate personalized resume insights aligned with job descriptions.

Medical Appointment System – Django

- Developed an online appointment booking and rescheduling system using Django, designing models for users, doctors, appointment slots, and scheduling logic to ensure smooth backend functionality.
- Created a user-friendly interface for patients to browse doctors and book available time slots using HTML and CSS, ensuring a smooth and seamless experience.

Financial Tracker - Python Flask + SQL

- Developed a Flask web application with MySQL to securely manage personal income and expenses.
- Built interactive dashboards using HTML/CSS and enabled PDF report exports via ReportLab.

EDUCATION

B.Tech in Computer Engineering – CGPA: 7.94

Savitribai Phule Pune University (SPPU)

06/2021 – 06/2025

ACHIEVEMENTS & CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (Feb 2024)

SOFT SKILLS

Problem-Solving · Adaptability · Team Collaboration · Detail-Oriented · Communication
