EXPERIENCE

GREEN PARK SOLAR PRIVATE LIMITED, REMOTE — FREELANCE DEVELOPER

MAY 2025 - JUNE 2025

I was primarily responsible for handling the backend development and database management of the company’s official website. Using Firebase as the backend service, I designed and implemented a real-time NoSQL database structure to store user inquiries, newsletter subscriptions, and automated email logs.

COMPARATIVE ANALYSIS OF EYE TRACKING KEYBOARD: MEDIAPIPE VS DLIB FOR GAZE BASED TYPING - IEEE PUBLICATION ICCNT

JANUARY 2025 - JULY 2025

Conducted a comparative study of Mediapipe and Dlib for gaze-based virtual keyboard systems. I contributed to the design of evaluation metrics, performed accuracy analysis, and researched optimal machine learning models and data handling techniques for implementation.

MENTORNESS, REMOTE — DATA ANALYST INTERN

MAY 2024 - JUNE 2024

I worked on cleaning and analyzing data, and built Power BI dashboards to visualize key patterns and feature impacts from the dataset.

META CRAFT LAB,REMOTE — FULL STACK INTERN

JUNE 2024 - JULY 2024

Built user interfaces for internal tools and handled database traffic management and data storage optimization. Ensured smooth and secure data access, contributing to efficient backend operations and system reliability.

SKILLS

- PROGRAMMING:** Java, Python, JavaScript, C
- FAMILIAR:** SQL, Node.js,Firebase, HTML,CSS,Jira
- VISUALIZATION:** Power Bi, MS Excel, PowerPoint
- SOFT SKILLS:** Communication, Teamwork, Leadership

EDUCATION—JANUARY 2022 - JUNE 2025 | 9.95(8.99)

South Indian Education Society Graduate School Of Technology, Nerul,Navi Mumbai - B.E. Artificial Intelligence and Data Science.

PROJECTS

EYE-TRACKING BASED VIRTUAL KEYBOARD

Developed a virtual keyboard that detects eye movements to type words on the screen. I contributed by handling model training for gaze detection and managing the database for real-time word display.

PERSONAL FINANCIAL DASHBOARD

Built a dashboard to track income, expenses, savings, and financial goals using real-time and historical data. I designed the colorful visual interface, created financial insights, and hosted it using Streamlit.

LLM BASED PDF SEMANTIC SEARCH

This project enables semantic understanding and intelligent search within PDF documents. It uses vector embeddings to represent text meaning and LLMs for natural language querying. The system allows users to ask questions and retrieve context-aware answers from PDF content.

ACHIEVEMENTS AND CERTIFICATIONS

- ISRO Bhartiya Antariksh Hackathon. Google
- Coursera The GEN AI introduction. Freedcamp
- Data analysis using Python. AspireForHer
- Generative AI workshop.
- IEEE Volunteer.
- Code Like Her Hackathon.
