SUMMARY

Business Analyst with hands-on experience in data analytics, specializing in data automation, quality assurance, and visualization. Proficient in Python, SQL, Power BI, and Excel for delivering end-to-end analytical solutions. Experienced in ETL processes, developing compliance scripts, and supporting Agile teams with actionable, data-driven insights.

EXPERIENCE

Netwin Infosolutions Pvt Ltd.

DEC 2024 - Present | Nashik, IND

Business Analyst

- Led a team of developers, managing task allocation and timelines, while ensuring seamless delivery of features in an Agile environment using JIRA, Scrum meetings, and sprint planning.
 - Worked as a Data Analyst on a project to design and develop an automated data validation framework using Python (Pandas) for verifying, transforming, and cleaning raw data. Integrated the solution with MySQL, resulting in a 99% improvement in data accuracy and reporting reliability.
 - Automated source data cleaning using SQL and Python, reducing duplicate records by over 20% and enhancing overall data quality.
 - Built Power BI dashboards for sales and customer analytics, enabling real-time visualization of KPIs for stakeholders and supporting strategic decision-making.
 - Wrote complex SQL queries and CTEs to extract meaningful patterns from large datasets and supported ETL workflows to streamline data ingestion and transformation pipelines.
-

PROJECTS

Sales Performance Analytics Dashboard – Enhanced Revenue Insights and Sales Strategy

Self-initiated

Jan 25 - Feb 25

- Built interactive dashboards using Power BI with dynamic slicers, filters, and conditional formatting to visualize sales trends, top-performing products, and underperforming regions.
- Utilized SQL to extract and transform sales, customer, and product data from a relational database.

E-commerce Analytics Dashboard- Customer Profitability & Product Performance Insights

Self-initiated

Dec 24 - Jan 25

- Developed interactive dashboards with dynamic filters, drill-throughs, and data storytelling to analyze product performance.
 - Ensured accuracy through DAX calculations and scalable data modelling.
-

EDUCATION

M.Tech - Masters in Computer and Information Technology

2022-2024

Savitribai Phule Pune University – SPPU • 8.93 CGPA

Bachelor of Engineering - BE in Computer Engineering

2019-2022

Savitribai Phule Pune University – SPPU • 9.59 CGPA

Diploma in Computer Technology

2016-2019

University of Mumbai – AICTE • 78.82%

SKILLS

Data Analytics & Business Intelligence: Power BI- DAX, Data Visualization, Data Modelling, Data Transformation

Database, Cloud & ETL: MySQL, Advance MS Excel

Programming: Python, SQL

Project Management & Agile: Agile Scrum, Jira
