SUMMARY

Results-driven Business Analyst with a proven record of delivering actionable insights, streamlining processes, and driving strategic business transformation. Skilled in translating complex data into clear, impactful solutions through comprehensive analysis, stakeholder engagement, and cross-functional collaboration. Demonstrated success in boosting operational efficiency, optimizing workflows, and supporting revenue growth via data-driven recommendations. Proficient in requirements gathering, gap analysis, and reporting, with hands-on expertise in analytics tools such as Power BI, SQL, Excel, and Agile project management.

EXPERIENCE

Business Analyst - Retail

Currys PC World, Ireland

September 2023 - May 2025

- Leveraged Power BI to identify and resolve inventory discrepancies, reducing holding costs by 20% and boosting stock availability.
- Developed and executed customer-centric sales strategies, raising customer satisfaction scores by 15%.
- Optimized store workflows using Agile and continuous improvement methodologies, cutting inefficiencies by 25%.
- Conducted targeted data analyses to inform strategic decisions and align store operations with business goals.
- Led cross-departmental communication to ensure stakeholder alignment on key initiatives and operational changes.
- Collaborated with partner brands including SKY Ireland to implement tailored in-store strategies, increasing product adoption and enhancing customer engagement.
- Analyzed partner product performance to refine positioning and contribute to revenue growth through data-driven sales insights.

Senior Analyst

Capgemini, India

September 2020 - June 2022

- Promoted to Senior Analyst within 10 months for consistently delivering high-quality results in data operations and business reporting.
- Led the migration of 50+ databases to AWS and Azure, reducing operational costs by 16% while ensuring zero downtime.
- Implemented SQL health checks and root cause analysis frameworks, resulting in a 30% reduction in system downtime.
- Automated key data workflows and optimized reporting processes, significantly improving turnaround times for business insights.
- Collaborated with cross-functional teams to gather requirements and deliver tailored, data-driven solutions aligned with project objectives.
- Developed project plans and monitored execution, ensuring timely delivery of milestones and compliance with SLAs.
- Mentored new analysts and supported onboarding initiatives, achieving a 95% success rate in team integration.

PROJECT

Divide to Grow

University College Cork • May 2023 - July 2022

- Python, R, Tableau, AWS, Predictive Modeling.
- Designed a web-based agricultural analytics platform to support market-driven crop planning and strategic farm decision-making.
- Built predictive models using Python/R to recommend crop allocations based on soil conditions and regional price trends.
- Created interactive dashboards in Power BI to visualize insights for ease of use by farmers and agri-consultants.
- Deployed the platform on AWS, ensuring scalability, real-time access, and future readiness for live data streams.
- Presented as a master's capstone project; validated against real-world use cases with positive feedback from academic reviewers.

Car Registration Number Recognition

Medi-Caps University • July 2020 - August 2020

- Python, OpenCV, SQL, Computer Vision.
- Developed an automated vehicle access control system using image processing and database verification.
- Used OpenCV to extract registration numbers from real-time video input with ~90% recognition accuracy during testing.
- Designed and integrated a SQL database to match detected numbers against an authorized vehicle list.
- Reduced manual entry verification steps, demonstrating practical application in gated security systems.
- Submitted as undergraduate thesis project and evaluated for potential deployment at university premises.

EDUCATION

M.Sc. in Business Information and Analytical System

University College Cork • Cork, Ireland • 2023

B.Tech. in Computer Science Engineering

Medi Caps University, India • India • 2020

SKILLS

Python, R, SQL, Power BI, Tableau, Excel

JIRA, Confluence, Agile

KPI Reporting, Requirement Gathering, Gap Analysis, Business Process Mapping

Stakeholder Management, Cross-functional Collaboration, Project Planning
