SKILLS

Technical Skills – Excel , Statistics , Regression , SQL , Tableau

Soft Skills – Business Communication , Client handling , Presentation Skills , Analytical Thinking , Problem Solving , Result Driven Methods .

EXPERIENCE

Senior Executive

FIBE

May 2024 – Present, Pune

- Conducted root cause analysis on overdue accounts, providing actionable insights that improved collection efficiency.
- Collaborated with cross-functional teams (finance, sales, and customer service) to design and implement data-driven strategies that reduced outstanding receivables.
- Monitored and reviewed detailed collection reports to identify process improvement opportunities and support strategic planning.
- Taught and mentored junior team members, sharing best practices and supporting skill development.
- Recognized with 'Above and Beyond' awards for consistently achieving and exceeding targets.

Executive

FIBE

September 2022 – April 2024, Pune

- Monitored and analyzed daily, weekly, and monthly collection reports to track performance and identify trends.
- Communicated with clients to resolve payment issues, ensuring timely collections while maintaining positive customer relationships.
- Assisted in automating routine reporting tasks, improving data accuracy and team efficiency.

PROJECT

Analysis on Amazon Sales Data

- Analyzed Amazon sales data alongside product ratings to uncover trends and understand what drives performance, using Excel, SQL, and Tableau. Collected and cleaned large datasets to ensure accurate insights.
- Explored how customer ratings influenced sales across categories, regions, and seasons. Built interactive Tableau dashboards to visualize sales trends, average ratings, and customer review sentiment.
- Used statistical analysis in Excel and SQL to identify correlations between higher ratings and increased sales, as well as patterns in customer buying behavior. Based on these findings, recommended practical steps to improve product quality, optimize inventory, fine-tune pricing strategies, and enhance customer satisfaction.
