SUMMARY

Detail-oriented and motivated Data Science graduate with experience in Python, SQL, machine learning, and data analysis. Worked on real-world projects involving IoT, automation, and AI. Skilled in building dashboards, cleaning data, creating predictive models, and presenting insights. Familiar with tools like Tableau, Power BI, and cloud platforms. Strong problem-solving and teamwork skills with a focus on delivering useful, data-driven solutions.

PROFESSIONAL EXPERIENCE

Alpha Technology

Bengaluru, Karnataka

Machine Learning & IoT Analytics Intern

Aug 2023 - Mar 2024

- Developed predictive maintenance models using IoT sensor data, reducing equipment downtime by 35%
- Used **Anaconda** and **Jupyter Notebook** for developing and testing machine learning models in Python
- Built automated ETL pipelines using Python and Apache Airflow for multi-source data integration
- Utilized machine learning techniques including Random Forest, XGBoost, and LSTM networks for time series forecasting

Deloitte (Forage)

Bengaluru, Karnataka

Data Analytics Virtual Intern

July 2025 - July 2025

- Completed 7+ project simulations related to data integrity, fraud detection, and financial analysis.
- Created Excel dashboards and Tableau visualizations to highlight trends and anomalies.
- Developed and visualized actionable insights using advanced Excel functions and Power BI dashboards

TECHNICAL SKILLS

Programming Language: Python, R, SQL, C++

Data Science & ML: Scikit-learn, TensorFlow, Keras, PyTorch, Pandas, NumPy, SciPy, Statsmodels

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn, Plotly, D3.js

Databases: MySQL, PostgreSQL, MongoDB, Redis, Apache Cassandra

Cloud & Bigdata: AWS, Google Cloud Platform, Apache Spark, Hadoop

Tools & Frameworks: Jupyter Notebook, Google Colab, Git, Docker, Airflow, MLflow, Apache Kafka

Web Technologies: Flask, Django, FastAPI, HTML5, CSS3, JavaScript, React.js

PROJECT EXPERIENCE

Advanced Customer Churn Prediction System

Technologies: Python, XGBoost, Flask, AWS, Docker

- Developed end-to-end machine learning pipeline predicting customer churn with 94% accuracy
- Implemented feature engineering techniques including RFM analysis, customer lifetime value calculation
- Deployed model using Flask API with real-time prediction capabilities on AWS EC2
- Created automated retraining pipeline using MLflow and Apache Airflow
- Built comprehensive dashboard using Streamlit for business stakeholders

Real-Time Stock Market Analysis & Prediction Platform

Technologies: Python, LSTM, Apache Kafka, PostgreSQL, React

- Engineered real-time data pipeline processing 50,000+ stock market transactions per second
- Implemented deep learning models (LSTM, GRU) for stock price prediction with technical indicators
- Developed sentiment analysis module analyzing 10,000+ news articles daily using BERT
- Built responsive web application with real-time charts and predictive analytics
- Deployed on AWS with auto-scaling capabilities handling 1000+ concurrent user

Intelligent Healthcare Analytics System

Technologies: Python, TensorFlow, MongoDB, FastAPI, Docker

- Developed medical image classification system achieving 96% accuracy in disease detection
- Implemented patient risk stratification model using ensemble machine learning techniques
- Created automated report generation system reducing manual work by 70%
- Built secure RESTful APIs following HIPAA compliance standards

EDUCATION

REVA University

Bachelor of Technology in Computer Science and Engineering
CGPA:7.8

Bengaluru, Karnataka

Graduation Date: Aug 2024

REVA Independent PU College

12th Grade - PCMC (Physics, Chemistry, Mathematics, Computer Science)
Percentage: 83%

Bengaluru, Karnataka

Completion Year: June 2020

Chaitanya Vidyalaya

10th Grade - Karnataka State Board
Percentage:81.6%

Bengaluru, Karnataka

Completion Year: April 2018

CERTIFICATION & ACHIEVEMENTS

- Data Analyst Certification - United Latino Students
- Introduction to Cloud Computing on AWS – Udemy
- AI and Data Scientist - One Roadmap

PUBLICATION & RESEARCH

- **"MediGuide"**: A platform designed to deliver tailored results during emergencies, integrated with a CustomML chatbot for enhanced assistance, Published in UGC CARE Journal (December 2024).

INTEREST & ACTIVITIES

- Artificial Intelligence, Cloud Infrastructure, and Software Innovation
- Game Testing, UI/UX Research, and Digital Experience Design
