WORK EXPERIENCE

DataToBiz

Feb,2025 - Present

Business Analyst Intern, Remote

- Client: Toshco & Quartz (Manufacturing Sector)
- Analyzed RFPs/RFIs to extract requirements, documented BRDs/FRDs, and created process workflows capturing both stated and unstated needs.
- Collaborated with Project Manager, tech leads, and architects to shape accurate solution responses and prototypes.
- Conducted regular cadence meetings with clients to clarify requirements, gather feedback, and drive alignment.
- Led demos and walkthroughs of proposed solutions, enabling stakeholder buy-in and business integration.
- Coordinated with delivery and QA teams to review test cases, facilitate UAT cycles, and validate final deliverables.
- Used Informatica PowerCenter, Azure Data Factory, and Power BI to support end-to-end solution implementation.
- Conducted root cause analysis for testing feedback and deployed changes for 100% functional coverage.
- Created reusable documentation assets and shared domain insights to contribute to the internal knowledge base.

Kratikal Tech Pvt. Ltd.

Sept 2023 - Jan,2025

Business Analyst, Noida

- Analyzed existing business processes to identify inefficiencies and improvement areas.
- Developed and documented “to-be” process models with actionable recommendations.
- Conducted gap analyses to highlight deviations between current and ideal process states.
- Utilized BPMN and other modeling tools to visualize workflows and process improvements.
- Analyzed datasets to uncover trends, patterns, and insights supporting strategic decisions.
- Developed and maintained interactive dashboards and reports to monitor key performance indicators (KPIs).

PROJECTS

US ACCIDENTS 2016-2021

- Analyzed 3M+ accident records to identify trends, hotspots, and risk factors.
- Created Power BI dashboards to visualize severity by location, time, and weather.Extracted insights to support data-driven decisions for traffic and safety planning.
- Translated complex data into actionable recommendations for risk mitigation.
