Aditya Kumar

## Summary

Proficient in Python and SQL, with a good background in data analysis, data visualization, and data cleaning, dedicated to achieving results. A collaborative team player with strong analytical skills and a commitment to continuous learning and thrive in environments where innovation and teamwork come together to create impactful solutions. Also bring a blend of technical expertise and genuine enthusiasm to effectively contribute in innovative software solutions and data-driven decision making.

## Education

|                                                                                                                                       |             |
|---------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Birla Institute of Technology, Mesra, Ranchi<br><i>Bachelor of Technology in Electrical and Electronics Engineering (CGPA - 7.65)</i> | 2021 - 2025 |
| Oxford Public School, Ranchi<br><i>12th (Percentage – 88.4)</i>                                                                       | 2019 - 2020 |
| Oxford Public School, Ranchi<br><i>10th (Percentage – 94.6)</i>                                                                       | 2017 - 2018 |

## Technical Skills

Languages: **Python, SQL**  
Frameworks: **Excel, Tableau, Power BI**  
Databases: **SSMS, MySQL**  
Tools: **VS Code**

## Internship Experience

Data Analyst Trainee | DevTown May 2024 - July 2024

- Performed in-depth analysis of multi-source user engagement data using **Python, Pandas, NumPy**, and **Matplotlib** to evaluate cross-platform performance, traffic sources, and conversion metrics, supporting data-driven decision-making.
- Identified significant variation in user conversion rates ranging from **4% to 56%** and revealed **3x** engagement, enabling data-driven recommendations to optimize user flow and retention.
- Segmented user behavior by events, geography, and demographics, detecting zero-conversion issues across **10+** user flows, a **99%** regional conversion concentration, and over **87K** conversions from high-value segments, enabling targeted retention initiatives.

## Projects

### Library Management System

- Developed a Library Management System in **Python** with features such as book and user management, borrowing/return functionality, and data persistence, ensuring smooth operations.
- Designed **object-oriented** classes for book types, users, and the core library system, improving code organization and enhanced search capabilities and implemented fine calculation for overdue books, ensuring effective data management.

### Movie Dataset Analysis

- Conducted exploratory **data analysis** on a movie dataset with over **1.1 million** records, performing extensive **data cleaning**, feature engineering by expanding nested attributes into **15** new analytical fields, and **visualizing** key trends using **Python, Pandas, NumPy, Matplotlib**, and **Seaborn** to support data-driven insights.
- Created an **SQLite** database from the processed dataset, leveraging **SQL** to write queries for aggregations, filtering and extract insights from the large, structured movie database.

### Bike Revenue Dashboard

- Developed an interactive dashboard on revenue of bikes using **Power BI**, enabling data visualization and delivering insights into revenue, profit, profit margin, rider trends, seasonal patterns, and hourly sales.
- Integrated **SQL** in SQL Server Management Studio to join multiple datasets, perform **data analysis**, and extract valuable insights through data queries.

## Certifications

- Python Essentials 1 and 2 (Cisco)
- Data Analytics Essentials (Cisco)
- Data Analytics and Visualization Job Simulation (Forage-Accenture)

## Extracurricular Activities

- National Service Scheme (NSS) volunteer, actively participating in community service and social outreach programs.
- SPORTS - cricket, badminton, and volleyball, representing in inter-hostel volleyball tournament at the college.
