

Aishwarya Kute

Data Engineer

Pune, India, +91 9004761945

aishwarya.kute10@gmail.com,[Linkedin](#)

Results-driven aspiring Data Engineer with a strong foundation in SQL, Python, and distributed data processing using PySpark. Passionate about building scalable data pipelines and optimizing data workflows. Seeking to contribute to data-driven decision-making at a forward-thinking organization by applying analytical skills, software engineering best practices, and hands-on project experience .

Areas of Expertise

- Languages : Python, SQL, Java, C, C++
- Frameworks C Libraries : NumPy, Pandas, Scikit-learn, TensorFlow, Keras, PySpark
- Cloud Platforms/Tools : AWS Services (Basics), ETL, Data Modeling, Data Warehousing, Data Cleaning Transformation, Tableau , Power BI

Professional Experience

JP Research India [\(Link\)](#)

Pune, India

Data Science Intern

January 2025–May 2025

- Improved processing speed of crash dataset analysis by 30% using PySpark for distributed computing.
- Cleaned and transformed over 1,000 accident reports using Python and Pandas, reducing data inconsistencies by 40%.Utilized PySpark for distributed data handling and performance optimization.
- Automated repetitive tasks using UiPath, including downloading multiple Excel sheets, retrieving FIR cases from web portals, and transferring data between spreadsheets, enhancing efficiency and reducing manual effort.

Labdox Pvt Ltd [\(Link\)](#)

Pune, India

Web Developer Intern

June 2024–August 2024

- Developed 5+ interactive web pages with embedded data visualizations, enhancing user engagement by 25%.
- Streamlined API integration and data structuring, reducing data retrieval time by 35%.

Projects

Smart Document Processor using OCR C LLMs

- **Tools:** Python, Tesseract OCR, Hugging Face, PySpark
- Automated text extraction and summarization from scanned documents. Enabled 80% faster document analysis for internal teams.

Stock Price Prediction using ARIMA

- **Tools:** Python, Pandas, Matplotlib, ARIMA.
- Forecasted stock trends with 70%+ accuracy using time-series modeling. Helped visualize market patterns for decision-making

Employee Classification Model

- **Tools:** Python, Scikit-learn
- Built and deployed a model to classify employee roles based on HR data. Improved role prediction accuracy by 30%, aiding better workforce analytics.

Education

Symbiosis Skills and Professional University, Pune B.Sc. Data Science – 9.1/10	2022 – 2025
Kendriya Vidyalaya, Thane PCMB – 89.4%	2020 – 2021
