Technical Skills

Languages and Databases: SQL

Visualization Tools: Power BI

Other Skills: Excel, Analysis, Data Analysis, Power Point, Data Processing, Reporting.

Soft Skills: Teamwork, Problem solving, Communication, Analytical Thinking.

Projects

Adaptive Changepoint Detection Algorithms for Anomaly Detection in Time Series Data

- To pinpoint suitable strategies for detecting changepoints on stock market prices in case of public and private banks.
- To compare various methods in literature that are used to detect changepoints in financial data.
- We taking only one variable (Open Price) of private and public banks and calculating their mean (private average and public average). Taking 10 pre and post observations from this calculating mean. Then, we proceed with the Hotelling's T-Squared test.
- There are changepoint detection based on sequential runs of cluster member c – means. As we can see tuning the c hyper parameter often helps in increasing or decreasing the number of changepoints.

STATISTICAL ANALYSIS OF COVID 19 CASES IN INDIA

- Conducted statistical analysis of COVID-19 cases in India and worldwide, focusing on trends and patterns over time.
- Investigated the weekly growth trends of COVID-19 cases to assess their significance and implications for public health interventions.
- Analysed the progression of COVID-19 death cases on a weekly basis to understand the severity and impact of pandemic.

Seminar

- ARCH Model

Education

- **Sardar Patel University, Anand** June 2022 – April 2024
Master of Science in Applied Statistics
- **Yashwantrao Chavan College, Karad** June 2019 – April 2022
Bachelor of Science in Statistics

Achievements

- **One day Awareness Workshop on official statistics organized by NSSA & Department of statistics**
Higher Score achieving in "Questionary Design Challenges" competition in one day Awareness Workshop on official statistics organized by NSSA & Department of statistics.
- **Participated in - Preliminary Round of Data Quest.**
Participating in preliminary round of data quest, by NOVO Nordisk services Centre India Private Ltd.

Certification

- Applied Machine Learning in Python
- Data Visualization With Power BI
