EDUCATION

Vellore Institute of Technology

-B.Tech. in Electronics and Communication with
Specialization in Biomedical Engineering

Vellore, India
Sep 2021-Jul 2025

TECHNICAL SKILLS

- **Languages -:** SQL, Python , Java, Matlab
 - **Visualization and Interpretation Tools-** Power BI, Tableau, MS Excel
-

EXPERIENCE

- [VLSI Design Intern](#)

Maven Silicon

Maven Silicon is a VLSI and embedded systems training provider.

Vellore, India
Aug,2023-Oct 2023

- Designed an SPI Master Core using Verilog.
- Executed over **150 simulation test cases** , leading to **96% functional code coverage** and **zero critical timing violations** during synthesis.
- Resulted in a **30% improvement in simulation-debugging efficiency**

- [TCAD Simulation Intern](#)

Motilal Nehru National Institute of Technology

It is a premier engineering and technology institute located in Prayagraj.

Prayagraj, India
Nov,2023- Dec, 2023

- Run simulation and optimized ZnO nanowire FETs using Synopsys Sentaurus TCAD
 - **Modeled and analyzed** a ZnO nanowire FET with **100 nm channel length** , **30 nm diameter** , and **$1 \times 10^{17} \text{ cm}^{-3}$ doping** to simulate realistic device behavior.
 - **Optimized** the design to **reduce leakage current by 25%**
-

PROJECTS

- [IoT SafeHaven](#)

Analyzed working conditions across major sectors in India using **100+ labor safety datasets**, designed a safety index model with weighted sensor thresholds achieving up to **60% improvement in occupational safety**, **20–30% boost in productivity**, and **25% reduction in implementation costs**.

- [SalesSight SQL Driven Retail Analysis](#)

An **exploratory data analysis** was performed on the Superstore Sales Data, to uncover insights into the **store's sales and profits trends and patterns** and developed **interactive dashboards in Tableau**.

- [Data Analysis of the world population](#)

Performed data analysis on a **dataset from the CIA World Factbook** to **extract , clean, and analyze** real-world data using **structured SQL queries** to filter countries to **identify highly dense nations**.

- [VANET](#)

Developed a **safety-focused Intelligent Transportation System** to analyzed global road safety data , where **93% of road fatalities** occur and **visualized the performance metrics** and **data disparities** using dashboards and comparative plots.

ACHIEVEMENTS

- Published a research paper titled “Implementation of IOT devices to improve working conditions of workers”
 - Contribution to a research paper titled “ VANET- vehicle traffic analysis”
-

CERTIFICATIONS

- AICTE Internship on PowerBI [\[Link\]](#)
 - Professional SQL for Data Analysis [\[Link\]](#)
 - Strategic Data Analyst Certification [\[Link\]](#)
 - Fundamentals of PostgreSQL and MongoDB [\[Link\]](#)
-
