Professional Efficiency

Aspiring Software Developer with hands-on experience in backend systems, API design, and scalable ML deployment. Eager to pivot into tech-driven business analysis roles involving people-centric change, digital transformation, and structured documentation. Passionate about building robust, real-world solutions that combine clean code with data-driven insights.

Education

2022–Present **B.Tech in Computer Science (AIML)**, VIT-AP University, CGPA: 9.02 / 10

2019–2021 **Higher Secondary**, SSVM NK Nagar, Percentage: 88%

2006–2019 **Matriculation**, SSVM Garadpur, Percentage: 90.17%

Experience

May–June 2025 **AI/ML Intern**, Prodigitaly Technologies LLP

- Collaborated with dev teams to define technical requirements and build a modular ML pipeline; documented workflow specs and helped cut dev cycle by 25%.
- Conducted data profiling, feature engineering, and performance tuning to boost model accuracy by 15% and reduce training latency by 20%.
- Built and tested REST APIs for real-time ML prediction delivery; participated in system testing and user validation cycles to ensure API reliability.

Academic Projects

Medical Chatbot, Python, NLP, Flask, Streamlit

- Developed a symptom-based disease prediction bot integrating NLP for intent recognition and dynamic UI with Streamlit.
- Built backend services using Flask to support API-driven interactions; tested with 30+ users during pilot launch.

Fake News Detection, Python, BERT, HuggingFace

- Conducted secondary research and benchmarking using the LIAR dataset to design a fine-tuned BERT classifier achieving 92% accuracy.
- Documented model logic and validation steps for real-time API deployment; achieved sub-200ms average response latency.

Skills

Languages Python, Java, HTML/CSS, R

Libraries NumPy, Pandas, Scikit-learn, Matplotlib, NLTK, HuggingFace Transformers

Frameworks Flask, Streamlit

Tools Git, Colab, VS Code, Postman, Jupyter, Notion, Trello (Basic)

Cloud & DB MySQL, Oracle Cloud

Concepts System Design, OOP, REST APIs, DSA, Machine Learning

Soft Skills Fast learner, collaborative, strong communicator, strategic thinker

Certifications

Python for AI Boston Training Academy — Built real-time demand forecasting pipeline with EDA.
Oracle Oracle Cloud Infrastructure — Designed a summarizer and interactive GenAI chatbot using
Generative AI OCI LLM modules.

Achievements

- Solved 200+ problems on LeetCode — <https://leetcode.com/u/Akankshya142>
- Contributed to open-source Python projects — <https://github.com/Akankshya1402>

Positions of Responsibility

2023–2024 **Event & Media Coordinator**, *Computer Society of India*

- Co-led the design and execution of 5+ tech workshops, crafting event narratives and promotional materials that drove 40% higher student turnout.

2024–Present **Design Team Member**, *Association for Computing Machinery*

- Created and delivered 10+ visually engaging presentations and digital assets to promote ML events, increasing event participation by 35%; aligned messaging with club goals.
