Education

Lovely Professional University

Aug. 2020 – June 2024

Bachelor of Technology - Computer Science and Engineering; CGPA: 7.50

Punjab, India

Relevant Coursework

- Data Structures
- Software Engineering
- Predictive Analytics
- Database Management
- Artificial Intelligence
- Data Visualization
- Operating Systems
- Cloud Computing

Projects

Shopify Sales Analysis | Python, NumPy, Pandas, Matplotlib

Apr 2025 – May 2025

- Performed comprehensive sales, customer satisfaction, and inventory analysis on a 10,000+ record dataset using Python (Pandas, NumPy)
- Calculated key KPIs including Total Sales, Average Sales, and Customer Ratings, leading to a 15% improvement in insight accuracy and reporting efficiency
- Created visualizations (Donut, Bar, Line, Funnel, Maps) using Matplotlib and Seaborn, showcasing trends like category-wise revenue contribution 35% from Pepperoni and sales growth over time up to 22%

HR Insightopia Dashboard | Tableau

Jan 2025 – Feb 2025

- Implemented an interactive Tableau dashboard using an HR dataset of 15,000+ employee records, focusing on productivity, retention, and workforce trends
- Enabled up to 60% increase in HR efficiency, automating analysis of key metrics like job satisfaction, attrition (by gender/age), work hours, and leave patterns
- Saved HR teams 3–4 hours daily, supporting data-driven decisions with clear, visual insights on performance, attendance, and educational field impact.

Pizza Sales Analysis | SQL

Jun 2024 – Sep 2024

- Analyzed pizza sales data using SQL across 4 integrated datasets containing 25,000+ records to extract actionable business insights.
- Calculated KPIs including total revenue of 817,860, top-selling pizzas, average daily orders, and identified L-size as the most ordered pizza (18,526 orders).
- Performed basic to advanced SQL queries for sales breakdowns by category, time, and pizza size, supporting data-driven decision-making.

Training Program Experience

External Input Training on DSA Programming

Jan 2023 – Feb 2023

C++ Training Program

- Completed a thorough C++ Programming training course focusing on Basics of Data Structures and Algorithms
- Learned Problem Solving Skills and How to Build Logic and how to Approach a Problem.

Skills

Programming: Python, C++, JavaScript, R, Java

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools: Power BI, Jupyter Notebook, Excel, Tableau, Git

Databases: MySQL, MongoDB

Big Data: PySpark, ETL, Data Wrangling

Technologies: AWS, Cloud Computing, Agile Methodology

Soft Skills: Leadership, Creativity, Problem Solving, Adaptability

Certificates

• Data Visualization with Tableau – Coursera

Developed interactive dashboards and visualizations using Tableau to extract business insights and present data effectively for diverse audiences and decision-makers.

• Python Fundamentals – Great Learning Academy

Strengthened understanding of Python basics, including syntax, loops, file handling, and modules, enabling efficient problem-solving for real-world applications.
