SUMMARY

Detailed-oriented and results-driven M.Tech Data Science student skilled in Python, SQL, Power BI. Experienced in data cleaning, visualization, and predictive analytics to drive business decisions. Seeking a dynamic role where i can leverage my analytical expertise to data-driven decisions and business growth.

EDUCATION

Master of Technology (Data Science)

JSS Academy of Technical Education

CGPA : 8.7

10/2023 – 08/2025

Bangalore

Bachelor of Engineering (ISE)

Basaveshwar Engineering College

CGPA : 7.34

08/2019 – 08/2023

Bagalkot

INTERNSHIP

Cognizant Technology Solutions

05/2025 -Present

Intern - Programmer Analyst

- Developed SQL queries with advanced concepts such as joins, subqueries, and window functions through data analysis case studies.
- Explored prompt engineering and foundational ML concepts to understand real-world applications of intelligent systems.
- Strengthened programming proficiency through exercises in Python built-ins, automation, and modular coding.

PROJECTS

Aggregates Image Classification using deep learning

Python, Tensorflow, Numpy, Pandas

- Developed a deep learning-based model to classify coarse aggregates using Convolutional Neural Networks (CNNs), improving classification accuracy by 85%.
- Achieved 79% accuracy in classifying aggregate sizes, enabling automated identification and quality control for construction projects.
- Utilized TensorFlow and Keras to train, evaluate, and fine-tune the model, achieving significant improvements over initial results.

Market Data Analysis

Power BI, SQL

- Conducted in-depth analysis of a large-scale food market dataset, using SQL queries to extract key sales and customer data.
- Identified customer preferences and market trends, enabling the development of strategies that increased customer acquisition by 10% and boosted sales revenue by 15%.
- Designed Power BI dashboards to visualize sales performance, improving data accessibility and decision-making efficiency by 25%.
- Automated weekly reporting processes, reducing manual reporting time by 40%.

SKILLS

- **Languages:** Python, SQL
- **Frameworks:** Pandas, NumPy, Matplotlib, Seaborn
- **Tools:** Power BI, Excel, Powerpoint, Tableau, SQL Server, Jupyter Notebook
- **Course Work:** Data Cleaning, Machine Learning, Dashboard Creation
- **Soft Skills:** Problem-Solving, Teamwork, Communication, Requirements Gathering, Reporting

CERTIFICATION

- Data Analytics Essentials by Cisco Academy
- Data Science Simulation by BCG
