## SUMMARY

Detail-oriented Analyst with 4 years of experience in customer support and data management roles. Proven ability in data cleaning, data modeling, and data visualization to support business intelligence and operational decision-making. Consistently enhanced service levels and procedural efficiency, significantly improving document retention and retrieval processes. Skilled in dashboards, KPIs, and storytelling with data to uncover insights and drive performance. Seeking to leverage analytical skills and expertise in MS Excel, Power BI, Tableau, and SQL to contribute to data-driven strategy and process optimization in a data analyst role.

## PROFESSIONAL EXPERIENCE

### Amazon

#### Customer Service Associate | Interim Resolution Specialist | Subject Matter Expert (SME)

July 2020 - September 2024, Pune

- Delivered multi-channel customer support with consistently high customer satisfaction scores, contributing to improved customer retention.
- Demonstrated adaptability by collaborating with teams across various OUs, ensuring consistent support standards and seamless transitions in dynamic environments.
- Maintained and updated customer data to ensure accuracy and timeliness.
- Streamlined record-keeping processes, enhancing document retrieval efficiency.
- Resolved high-priority tickets and SIM-related issues, reducing handling time by 20%.
- Led onboarding sessions, trained new hires, and delivered performance insights to leadership.
- Participated in multiple Internal Job Postings (IJP), reaching the final interview for a managerial role—a highly competitive achievement.
- Built internal dashboards to visualize service performance and root causes.
- Performed ETL operations using SQL to extract and organize customer data for trend analysis and reporting.
