PROFESSIONAL SUMMARY

Analyst skilled in SQL, Python, Power BI, and Excel, with strong expertise in data cleaning, modeling, analysis, and visualization. Experienced in translating complex data into actionable business insights, supporting strategic decision-making through effective stakeholder communication and business requirements analysis.

SKILLS

Data Analysis: SQL, Excel, Python (Pandas, NumPy)

Data Operations: Extraction, Cleaning, Modelling

Project Management: Jira, Confluence

AI Tools: ChatGPT, Microsoft Copilot, Fabi.ai

Data Visualization: Power BI, Tableau, Matplotlib

Dev Tools: Git, GitHub

Documentation: Workflow Mapping, BRD, SRS, FRD

Other: UAT, Problem Solving (MECE, RCA)

EXPERIENCE

HeapTrace Technology Pvt. Ltd

Business Analyst

Pimpri-Chinchwad, Pune

March 2024 - September 2024

- Worked as a Business Analyst on Opsiana; a digital product supporting marine fuel logistics and analytics – from development to go-live phase.
- Collaborated with developers in Agile/Scrum setup; led sprint planning, backlog grooming, created wireframes and mockups, and presented weekly project progress report to the CTO.
- Post go-live, took ownership of operational data analysis using Excel and SQL to track vessel activity, fuel consumption patterns, route efficiency, and user engagement, while identifying performance trends and potential cost-saving opportunities.
- Designed Power BI dashboards to monitor on-time fuel delivery, supply success rates, and vessel usage activity. Additionally, developed a weekly task tracking report to visualize team-wise hourly distribution and effort allocation across key project activities.

PROJECTS

HR Analytics [\[LINK\]](#)

EDA and Power BI Reports for Employees Attrition and Performance Analysis

Feb 2025 - Mar 2025

SQL, Excel, Power BI

- Executed 15+ scenario-based EDA and built an interactive Power BI dashboard using SQL, Excel, and DAX to uncover actionable insights on workforce attrition, performance, and engagement for strategic HR decision-making.

Insurance Analytics [\[LINK\]](#)

EDA and Power BI Reports for Claims, Retention, and Revenue Forecasting

April 2025 - May 2025

SQL, Excel, Power BI, Python

- Performed advanced SQL and Python based EDA (using Pandas, NumPy, and custom functions) across 15+ insurance scenarios and developed an interactive Power BI dashboard with DAX to analyze churn, retention, profitability, and premium trends; integrated revenue and claims forecasting to support strategic planning and data-driven marketing decisions.

Learnings: Gained hands-on experience in approaching business datasets with a strategic lens; understood how companies utilize analytics for decision-making; strengthened expertise in SQL, Excel, Power BI, and Python while learning to derive actionable insights and forecast KPIs aligned with business objectives.

EDUCATION

Sinhgad Institute of Management

Master of Business Administration (Business Analytics)

CGPA: 8.7/10

Pune

Nov 2022 - July 2024

CERTIFICATIONS AND ACHIEVEMENTS
