

ANANT GUPTA

Data Science professional with hands-on experience in NLP, Sentiment Analysis and time series forecasting. Skilled in building data pipelines, predictive models and interactive dashboards for actionable insights.

WORK EXPERIENCE

Poly Medicure Ltd, Faridabad

GET-IT

02/2025 – 07-2025

- Automated custom reports using ABAP for internal business workflows.
- Contributed to internal dashboard development and metric monitoring tools.
- Created data dictionaries, custom tables, and views to support structured data warehousing.

Webstiffy Technology, Jaipur

Web Developer Intern

11/2023 – 03/2024

- Designed modular web components and collaborated on code Versioning via Git/Github.
- Initiated user-focused functionality enhancements using custom Wordpress plugins.

PROJECTS

TalentScout – AI Hiring Assistant

07/2025

- Built an AI based hiring assistant using Python to automate resume parsing and candidate job matching.
- Achieve a 60% faster shortlisting through intelligent resume analysis and keyword extraction.

Sentiment-Driven Trader Behavior Analysis

07/2025

- Analyze trader performance and profitability across market sentiment phases using fear & grade index and trade level data.
- Identified higher trading activity and slightly increased profits during great periods, revealing the error sentiment alignment.
- Clean merged and standardized multisource datasets to enable daily sentiment rate correlation.

Stock Data Analysis System

05/2024

- Generated an end-to-end data pipeline for stock market data using Python.
- Built KPIs and trend metrics using time series forecasting.
- Presented insights through an interactive dashboard.

Pronunciation Mistake Detector

10/2024

- Integrated basis CRM style account handling with data enrichment and validation prior to analysis.
- Built an interactive feedback system to help user improve pronunciation, with a 90% accuracy rate in error detection.
- Integrated MySQL for secure data management.
