Education

Indian Institute of Information Technology, Nagpur

Jul 2021 – May 2025

B.Tech in Computer Science and Engineering

Relevant Courses: Data Structures, Operating Systems, DBMS, Networking

Class 12 (CBSE): 84%

Technical Skills

- **Languages:** C, C++, Java, Python, JavaScript, SQL
- **Frameworks/Tools:** React.js, Next.js, Node.js, Express.js, TypeScript, TailwindCSS, Bootstrap, Git, GitHub
- **Databases:** MongoDB, MySQL
- **Concepts:** OOP, DSA, REST APIs, JWT, Responsive Design

Experience

KollegeApply Pvt. Ltd. – Frontend Developer Intern

Jan 2025 – Present

- Developed and maintained 6+ frontend components using Next.js and TypeScript, improving UI and modularity.
- Enhanced admin dashboard by integrating custom CMS tools, resulting in faster and more efficient task execution.
- Integrated RESTful APIs with efficient data fetching, reducing page load time by 40% and improving responsiveness.

Cognifyz Technologies – Frontend Intern

Aug 2024

- Built and deployed 2 responsive websites using HTML5, CSS3, JavaScript, and Bootstrap, enhancing compatibility.
- Implemented dynamic form validation and third-party API integration, increasing interaction rate by 25%.
- Structured reusable styles using Sass for scalable CSS, reducing design inconsistency and maintainability.

Projects

WhatsApp Chat App – MERN + Socket.io + JWT

2024

- Designed and deployed a real-time messaging app with secure authentication using JSON Web Tokens (JWT).
- Enabled two-way communication using WebSockets via Socket.io, achieving updates with low latency for 10+ users.
- Stored encrypted chat logs in MongoDB, ensuring persistent and secure communication history.

OZONE 2.0 GYM App – React.js + Express + Tailwind

2023

- Engineered a responsive app for gym management with features like BMI calculator and tracking, used by 10+ demo users.
- Integrated backend routes using Express.js for seamless data flow between frontend and endpoints.
- Automated user engagement using Nodemailer, notifying users about sessions and workout updates.

Sudoku Solver – C++

2022

- Built a backtracking-based Sudoku solver that handles 9x9 grids in under 100ms with accuracy.
- Followed object-oriented paradigms to encapsulate logic into modular and testable components.
- Included custom test cases and utilities to validate edge cases, enhancing code clarity.

Certificates

- **Full Stack Developer (Udemy)** – Built full-stack web apps using MERN stack.
- **JavaScript & React JS (Scaler)** – Created interactive web UIs using React.js.
- **DSA with C++ (Udemy)** – Solved complex problems using C++ and STL.
- **AI Tool Workshop** – Explored no-code AI tools for workflow automation.

Coding Profiles

LeetCode: Solved 300+ coding challenges focused on arrays, linked lists, recursion, and trees. Enhanced algorithmic thinking and time-space optimization skills, aligned with technical interview standards. [View Profile](#)
