

PROFILE SUMMARY

- Budding professional aiming to pursue a career in data analytics and visualization, focusing on Power BI, SQL Server, and Data Warehousing.
- Contributed to the development of extensive data solutions by crafting interactive dashboards and detailed reports that empower stakeholders to make informed business decisions.
- Proficient in Power BI with hands-on experience developing interactive dashboards and visual reports using DAX and Power Query.
- Skilled in writing and optimizing complex SQL queries for data extraction, transformation, and validation in relational databases like SQL Server.
- Experienced in data modeling using star schema, fact and dimension tables, ensuring accurate and scalable reporting structures.
- Familiar with Power BI Service for publishing reports, managing workspaces, and scheduling data refresh.
- Knowledge of ETL processes using tools like SSIS to streamline data integration and transformation.
- Strong foundation in statistics and data analysis with the ability to derive actionable business insights.
- Quick learner with strong problem-solving, analytical, and communication skills, capable of working in both team and independent environments.

CORE COMPETENCIES

- Data Visualization
- Business Intelligence Solutions
- Data Warehousing Concepts
- Analytical Problem Solving
- Reporting and Dashboard Design
- Data Transformation Techniques
- Performance Metrics Analysis
- User Experience Optimization
- Data Governance Practices
- Statistical Analysis
- Data Dash boarding

SOFT SKILLS

- Change Agent
- Collaborator
- Communicator
- Adaptability
- Planner
- Leadership

EDUCATION

- ➔ **Bachelor of Engineering (B.E.) – Electronics & Communication**, JSS Academy of Technical Education, Bengaluru (VTU) | 2020 – 2024 | CGPA: 7.72/10
- ➔ **Pre-University Course (PUC)**, Sri Aurobindo PU College, Shivamogga | 2018 – 2020 | Percentage: 90.83%
- ➔ **Secondary School Leaving Certificate (SSLC)**, Saandeepani English High School, Shivamogga | 2017 – 2018 | Percentage: 95.36%

CERTIFICATION

- ➔ Master Data Analytics Using Power BI – Go Online Trainings

INTERNSHIPS

Virtual Internship at Tata | 2024

Role:

- Completed a structured internship focused on business insights and decision-making using Power BI.
- Created visually compelling dashboards and interactive reports to support strategic analysis and data-driven storytelling.
- Developed a deeper understanding of data visualization principles, data connectivity, and report publishing in Power BI Service.

Data Analytics Using Power BI at Goonlinetrainings | 2023 | (6 Months)

PROJECT: TARDIS – Power BI Developer | **Client:** TORUS (UK) | **Domain:** Healthcare | **Tools:** SQL & Power BI

Role:

- Developed interactive dashboards using sales data, incorporating drill-down and drill-through functionalities to enable detailed business insights for stakeholders.
- Created region-specific reports and performed data transformations using Power Query, ensuring clean and structured data for reporting.
- Wrote and optimized complex DAX functions and SQL queries to support robust data modeling and enhance the accuracy of reporting metrics.
- Integrated advanced Excel tools such as Power View, Power Query, and Power Pivot to support comprehensive data analysis and visualization efforts.

TECHNICAL SKILLS

- Databases:** SQL Server 2019
- Visualization & Reporting Tools:** Power BI, Excel, Power View, Power Pivot, Power Query
- ETL Tools:** SQL Server Integration Services (SSIS)
- Languages & Query Tools:** SQL, DAX
- Data Modeling & Architecture:** Star Schema, Fact Tables, Dimension Tables
- Operating Systems:** Windows 11 Pro

PERSONAL DETAILS

Date of Birth: 4th March, 2003
Address: Karnataka
Languages: English, Hindi, Kannada
