EDUCATION

- University of Lucknow** Nov 2021 - June 2025
Bachelor of Technology - Computer Science and Artificial Intelligence CGPA-8.44
Courses: Introduction to Data Analytics, DBMS, Professional Communication, Python

SKILLS

- Programming Languages:** C/C++, Python, SQL
- Tools:** Microsoft Excel(Advanced- PivotTables, VLOOKUP, Dashboards), PowerPoint, Google Sheets
- Data Analysis:** Data Cleaning, EDA, Time Series Forecasting, Dashboarding, Risk Metric Analysis, Data Validation
- Libraries/Frameworks:** Scikit-learn, Pandas, NumPy, Matplotlib
- Soft Skills:** Leadership, Communication, Cross-functional teamwork, Attention to detail, Presentation of insights
- Technical Skills:** Data Structures and Algorithms, DBMS, Computer Network, Operating Systems

EXPERIENCE

- Student Intern** Aug 2024 - Oct 2024
NIELIT Lucknow, UP
 - Explored methods and algorithms to develop a model to detect objects and activities.
 - Built a heart disease prediction model using Logistic Regression, achieving 85% accuracy after preprocessing and feature selection.
 - Collaborated with peers in scheduling, data cleaning, and results reporting, enhancing documentation and reproducibility.
- Wikimedia Foundation** Remote
Contributor March 2023 - April 2023
 - Conducted multilingual research to identify translation imbalances across Wikipedia pages.
 - Collaborated with a global team, conducted user research, and proposed actionable solutions to improve content parity.

PROJECTS AND REPORTS

- Carbon Emissions Impact Analysis**
 - Analysed the relationship between CO emissions and global temperature anomalies using statistical methods, including correlation and regression modelling.
 - Applied time-series analysis on 60 years of historical data to forecast environmental risk trends using Pandas, Statsmodels, and Plotly.
 - Ensured data completeness and performed outlier detection to validate model reliability and trend accuracy.
- Sales Trend and Revenue Risk Analysis**
 - Analyzed 10K+ sales records using SQL and Excel to uncover peak sales hours, customer patterns, and revenue trends.
 - Identified weekends as 40%+ of revenue share with risk-prone high-volume hours (12–1 PM, 5–6 PM).
 - Built an interactive Excel dashboard with 8+ KPIs for real-time business insights and operational planning.
- General Election of India 2024 - Result Analysis**
 - Conducted end-to-end analysis of multi-source election data using MS SQL Server; integrated party, state, and constituency-level datasets for comprehensive trend analysis.
 - Developed and executed advanced SQL queries to analyse voting patterns, alliance performance (NDA, INDIA, OTHER), and EVM vs Postal vote impact
 - Identified key electoral trends such as close contests, major voter shifts, and the decisive role of regional parties in shaping the outcome.
- Customer Segmentation with Machine Learning**
 - Applied unsupervised machine learning (K-Means Clustering) on customer transaction data to segment users into distinct behavioural groups, using Python, Pandas, Scikit-learn, and Matplotlib/Seaborn for data preprocessing, model building, and visual analysis to support targeted marketing strategies.

ACHIEVEMENTS

- AI ML Scholar '24:** Selected among 1,000 scholars for AWS training, mastering machine learning via Udacity.
- Harvard WE Amplifier Scholar '23:** Earned the prestigious WE Amplify scholarship to attend Harvard's WECode, engaging with 1500+ peers and industry leaders.
- GHCI Scholar '24:** Attended the world's largest women's tech conference, networking with experts and exploring emerging tech opportunities.
- Received Gold badge in SQL by solving 100+ problems on the Hackerrank platform.
- Solved 500+ problems on LeetCode and GeeksforGeeks

POSITION OF RESPONSIBILITY

- Rewriting The Code** Jan 2023 - Present
Member: Attended events, navigated available opportunities, networked with peers and mentors
- National Service Scheme(NSS)** Feb 2022 - April 2023
Volunteer: Led 3 surveys and spread awareness of education and health in slum areas
