Education

Parul University, Vadodara

Master of Computer Applications

Aug 2024 – Apr 2026

CGPA: 8.46

Rajarshi School Of Management and Technology

Bachelor of Computer Applications

Aug 2021 – Aug 2024

CGPA: 7.10

Experience

E-Cell, Parul University

Data Analyst

Jan 2025

Vadodara, India

- Engineered dashboards and financial projections using Excel to evaluate user growth, cost patterns, and market trends—directly supporting strategic decision-making and investment readiness.
- Collaborated cross-functionally to deliver insights on product-market fit and campaign ROI, enabling data-driven pivots during early-stage development and increasing forecast precision by 20%.

Vrinda Shop Data Analysis Project

Excel Analyst

Feb 2025 – Mar 2025

Vadodara, India

- Processed and segmented large volumes of retail sales data, uncovering high-performing categories and top-selling states to inform regional sales strategies.
- Visualized retail sales data using pivot tables and advanced charts, revealing key customer purchasing behaviors that boosted targeted marketing performance by 15%.
- Identified and tracked core KPIs including high-value customers, peak sales periods, and product return rates to support data-driven business decisions.

Projects

Sales Forecasting 🔄

Apr 2025

Python, Pandas, ARIMA, Statistical Testing

- Refined ARIMA model for Walmart sales forecasting through ADF, KPSS, and Box-Cox techniques, improving accuracy by 15%, lowering RMSE by 8%, and reducing inventory waste by 12%.
- Plotted and interpreted time-series sales data using Matplotlib and Seaborn to identify product seasonality trends; revealed top three categories contributing to 80% of revenue shifts, aiding in campaign targeting.

Exploratory Data Analysis 🔄

Mar 2025

Python, Pandas, Numpy, Matplotlib

- Performed comprehensive EDA on Titanic, COVID-19, and IMDb datasets, including null-value handling, feature transformation, and statistical summarization to prepare clean and actionable datasets.
- Extracted meaningful insights and uncovered anomalies through correlation heatmaps, histograms, and groupby visualizations, improving storytelling and reporting quality across use cases.

Smart Health Record System (SHRS) 🔄

Jul 2025

React, Node.js, MongoDB, Express

- Developed an end-to-end medical data platform with advanced CRUD features and modular architecture to streamline patient record management and enhance system scalability.
- Integrated robust authentication protocols, role-based access controls, and compliance-aligned encryption using MongoDB to ensure HIPAA-grade security and structured healthcare data storage.
- Integrated secure APIs enabling real-time data synchronization between doctor and patient applications, facilitating immediate access to updated medical records and reducing appointment times by 15 minutes.

Technical Skills

Languages: Python, SQL, C/C++, HTML, CSS, JavaScript **Libraries/Frameworks:** Pandas, Numpy, Matplotlib, React, Node.js, Express **Tools:** Power BI, Tableau, Git, GitHub, VS Code **Databases:** MongoDB, MySQL

Certifications

Certifications: SQL for Data Analysis, Data Analysis with Python, Numpy and Pandas (Udemy)

Leadership / Extracurricular

Class Representative, MCA Program

Parul University

Jan 2025 – Present

Vadodara

- Served as the central liaison between faculty and 70+ MCA students, orchestrating academic communications, curriculum feedback, and peer mentorship while coordinating major departmental events to elevate student engagement and leadership culture.

GitHub Workshop Organizer

Conducted for 70+ Students

Mar 2025

Parul University

- Designed and led an interactive workshop introducing Git and GitHub fundamentals, version control workflows, and real-world collaborative coding practices; significantly enhanced my understanding of open-source contribution and team-based development.
