Education

Motilal Nehru National Institute of Technology (MNNIT) Allahabad

2021 – 2025

B.Tech., Electrical Engineering (CGPA= 7.3/10)

Prayagraj, Uttar Pradesh

Professional Experience

Data Analyst Intern – Mentorness

July 2024 – August 2024

- Utilized **SQL** and **Power BI** to analyze and visualize data for actionable business insights.
- Enhanced SQL queries for a **Pizza Sales Analysis** project, uncovering significant sales trends.
- Developed an interactive **IPL Analysis Dashboard** in Power BI featuring key player metrics and visuals.
- Performed data cleaning, transformation, and modeling to improve data quality and processing efficiency.
- Discovered sales trends and delivered strategic recommendations to support revenue growth.

Technical Skills

- Programming Languages:** Python, SQL
- Data Analysis Tools:** Power BI, MS Excel, Google Sheets
- Libraries/Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn
- Databases:** Google Analytics, MySQL
- Other Skills:** Data Cleaning, Data Visualization, Data Modelling, Machine Learning (Basics)
- Soft Skills:** Communication Skills, Analytical Thinking, Critical Thinking, Leadership, Time Management, Attention to Detail, Problem Solving, Teamwork

Projects

SalesTrend Insights(Team-Project) | Technologies:Python, Pandas, Power BI, Jupyter Notebook. 2024

- Conducted data-driven analysis on sales data to uncover trends in customer behavior, revenue, and profitability using Python and Pandas.
- Built interactive dashboards and visualizations with Power BI to showcase monthly sales trends, regional performance, and product profitability.
- Identified top-performing products and regions, enabling data-backed recommendations to improve business strategies.
- Preprocessed and transformed raw sales data for comprehensive exploratory data analysis (EDA).

T20 Performance Tracker(Team-Project) | Technologies: Python, Pandas, Power BI, Jupyter Notebook.2024

- Analyzed T20 cricket data to evaluate player performance and team strategies using Python and Pandas.
- Built interactive dashboards and visualizations in Power BI to showcase batting strike rates, bowling economy, and win/loss ratios.
- Preprocessed datasets and performed trend analysis to derive insights and suggest improvements in team strategies.
- Enhanced a basic tutorial project by adding new features such as [specific modification you made].

Certifications

- Advanced Google Analytics** – Google
- Data Science Job Simulation** – BCG X
- Data Analytics Job Simulation** – KPMG
- Introduction to Strategy Consulting** – BCG

programming Achievements

- Achieved a LeetCode rating of **1855 (Knight Wadge)**, securing a global rank of **663 among 27,000 participants**
- Achieved ratings of **1795 on CodeChef** and **1410 on Codeforces**, showcasing strong competitive programming skills.”
