EDUCATION:

Bachelor of Technology in Computer Science & Information Technology
ITER, Siksha O Anusandhan University, India

[CGPA: 8.02]

07/2018-08/2022

SKILLS:

Programming languages: Python (Pandas, Numpy, Matplotlib, Seaborn)

Machine Learning: Linear Regression, Logistic Regression, K-Means Clustering, Decision Trees

Data Cleaning & Processing: Data Cleaning, Data Preprocessing, ETL, Data Handling, Data Normalization.

Data Visualization: Power BI, Tableau, Plotly

Databases: SQL Server, MySQL

Tools & Platforms: Advanced Excel, Jupyter Notebook, Google Colab, Streamlit, Quadratic

EXPERIENCE:

Associate Software Engineer – Mphasis

07/ 2024 -10/ 2024

- Built internal tools using ASP.NET and SQL Server to automate team workflows, improving tracking efficiency by 30%.
- Designed and developed custom automation modules, reducing manual data handling in web apps by 40%.
- Co-worked on backend integration and unit testing, ensuring clean data flow between APIs and databases.
- Resolved system-level issues and increased data retrieval speed by 20% via optimized indexing.

Business Analyst – BlockCod Technologies

06/2023 – 09/2023

- Partnered with enterprise clients to define KPIs, gather business requirements, and deliver analytics solutions that aligned with operational goals and improved efficiency by 10–15%.
- Analyzed large datasets using Excel and SQL to identify trends and performance bottlenecks.
- Executed end-to-end performance evaluations, resulting in a 15% improvement in client workflow efficiency.
- Delivered interactive dashboards that empowered real-time decision-making for senior stakeholders.

PROJECTS:

Amazon Review Sentiment Analysis – Python | Streamlit | VADER | Pandas | Plotly

06/ 2025

- Built a real-time NLP application that classified 1000+ Amazon product reviews into sentiment categories using VADER.
- Integrated Google Sheets API to automate tagging, reducing manual input time by 80%.
- Developed an interactive Streamlit Dashboard visualizing trends across 100+ products using pie charts, heatmaps, and box plots.
- Enabled CSV export and laid the foundation for automated reporting, improving reporting time by 60%.
- Demonstrated hands-on experience in API integration, real-time analytics, and UI development.

IMDB Movie Analysis- Microsoft Excel

03/ 2025

- Conducted a self-initiated analysis of 1000+ movies to identify key factors influencing IMDB ratings and movie profitability
- Performed Exploratory Data Analysis (EDA) using Excel functions like pivot tables, conditional formatting, and filtering to clean and organize new data.
- Analyzed 8+ variables such as genre, duration, language, director, and budget for correlation with box office success.
- Found a weak correlation (0.11) between budget and gross earnings, suggesting other variables like genre or a director play a more significant role in success.

CERTIFICATIONS / AWARDS:

- Onlei Technologies Data Analyst Training Certificate
- Tranity Data Analytics Live Project Certificate
- Deloitte Australia Data Analytics Job Simulation on Forage
