SUMMARY

Aspiring Full Stack Developer with hands-on experience in designing and developing web applications using modern technologies like MERN Stack. Passionate about learning new technologies and building innovative solutions. Dedicated to delivering high-quality solutions with efficient code and responsive design.

EDUCATION

Bachelor Of Engineering In Electronics And Telecommunication

Nov 2020 - June 2024

Padmabhooshan Vasantdada Patil Institute of Technology

CGPA : 7.77

SKILLS

Frontend Technologies: HTML5, CSS3, Bootstrap 5, JavaScript (ES5 & ES6), React.js, Python

Backend Technologies: Express.js, Node.js

Database: MongoDB, SQL

Tools: Visual Studio Code, Git, GitHub, Pycharm

Soft Skills: Communication, Team Collaboration, Problem Solving, Time Management

PROJECTS

Employee Management System

Tech Stack: React.js, JSX, CSS, HTML, JWT Tokens

Developed a full-stack Employee Management System with CRUD operations to manage employee records efficiently. Implemented secure user authentication using JWT Tokens to protect user data and ensure authorized access. Designed a responsive front-end interface with React.js, featuring dynamic forms and interactive data tables. Integrated MongoDB as the database for scalable and efficient data storage.

Complaint Management System

Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT Tokens

Designed and developed a Complaint Management System to streamline the process of lodging and resolving complaints. Users can register, log in, and submit complaints with relevant details, while the Admin panel allows authorized personnel to view, update, and resolve complaints. Implemented JWT Tokens for secure user authentication and Bcrypt.js for password encryption.

Air Canvas Using Machine Learning

Tech Stack: Python, OpenCV, NumPy, Mediapipe, Machine Learning

Developed an Air Canvas Application that enables users to draw in the air using hand gestures captured through a webcam. The project uses OpenCV for real-time video processing and Mediapipe Hand Tracking to detect hand landmarks and fingertip positions. Designed gesture recognition to identify index finger movement for drawing and both fingers for selecting colors or erasing. Integrated dynamic color palette selection, thickness adjustment, and gesture-based undo functionality.

INTERNSHIP

Data Analyst Trainee (DAT) | MedtourEasy

Feb 2024 - Mar 2024

- Gathered and organized healthcare-related data from electronic health records (EHR), patient databases, and administrative records. Applied statistical analysis techniques to identify trends, patterns, and correlations in healthcare data, providing actionable insights for process improvements and decision-making.

CERTIFICATIONS AND ACHIEVEMENTS

- Semi-Finalist in CodeUnnati Innovation Marathon (SAP).
- Google Data Analysis Certification.
- Mern Stack Certification(Itpreneur)
- Lead In Scout-Guide Camp
- SAP ABAP Certification(Edunet)
