EXPERIENCE

BARCO ELECTRONIC SYSTEMS PVT. LTD. | SOFTWARE ENGINEER INTERN

June 2024 – Aug 2024 | Noida, India

- Built a dynamic employee data management system using the MEAN stack (MongoDB, Express.js, Angular 18, Node.js) with modular components and RESTful APIs.
- Integrated multilingual support (French and Dutch) using Angular i18n to enhance global team accessibility and inclusivity.
- Collaborated with cross-functional teams to implement role-based access control, ensuring secure and structured employee data access.
- Gained hands-on experience in backend data modeling, frontend dashboards, and scalable enterprise-level architecture.

PROJECTS

60-DAY METABOLIC HEALTH TRACKER | GOOGLE SHEETS, APPS SCRIPT, JAVASCRIPT [GitHub Link](#)

- Built an automated health dashboard tracking 13+ metrics over 60 days using Google Forms and Sheets.
- Automated form sync and monthly PDF reports via Apps Script; analyzed 780+ entries to extract wellness insights.

SALESVISION: POLISH B2C B2B PERFORMANCE DASHBOARD | Ms EXCEL, SQL SERVER, GOOGLE SHEETS [GitHub Link](#)

- Built an interactive Google Sheets dashboard to visualize key metrics—sales, profit, returns—across cities, customer segments, and product categories.
- Extracted business insights from 1,300+ orders to optimize regional performance, product strategy, and sales timing.

ZEPTO INVENTORY INSIGHTS | SQL SERVER, EXCEL [GitHub Link](#)

- Cleaned and structured 3,732 SKUs from Zepto's inventory dataset; standardized pricing data and removed 120+ invalid entries to ensure analytical accuracy.
- Identified ₹3.3L+ in missed revenue from 453 out-of-stock high-MRP SKUs and analyzed 14 categories to uncover top-performing and discount-sensitive segments.
- Created price-per-gram and weight-based segmentation models for 2,100+ SKUs to optimize packaging, logistics, and category-level pricing strategy.
