SUMMARY

Detail-oriented and analytical Engineering graduate seeking a Business Analyst role where I can leverage my skills in data analysis, problem-solving, and strategic planning to deliver actionable insights and drive business growth.

PROJECTS

1. Market Analysis Dashboard for Sales Optimization

- Tools: Power BI, Excel, SQL
- Developed a dynamic dashboard analyzing sales data from different regions and product categories. Identified underperforming products and optimized sales strategies, improving revenue predictions by 20%.

2. House Price Prediction Using Machine Learning

- Tools: Python, Scikit-learn, Decision Tree Regressor
- Analyzed housing datasets to predict property prices based on features like location, area, and amenities.
- Used EDA and regression models to deliver insights for real estate investment planning.

3. Labor-Customer Service Interface (Skillset Labor Project)

- Tools: Python, Django, SQL
- Created a web-based application to connect customers with labor services based on skill, location, and availability.

EDUCATION

Infant Jesus School

10th- 90.8

March 2019

12th- 95.8

March 2021

B.Tech – Artificial Intelligence & Data Science

Chameli Devi Group of Institutions, Indore

CGPA: 8.2

sep 2021- june 2025

TECHNICAL SKILLS

- Business Tools: Excel, Power BI, Tableau, SQL
- Programming: Python (Pandas, NumPy, Matplotlib), Django
- Data Analytics: Data Cleaning, EDA, Machine Learning Basics
- Soft Skills: Communication, Leadership, Critical Thinking, Teamwork, Time Management

CERTIFICATIONS & ACHIEVEMENTS

- IBM SkillsBuild – Summer Internship Program (Data Analytics & Visualization)
- Internship – IIT Indore (Sensor Technology)
- Core Team Member – Citronics (Techno Management Fest)

CO-CURRICULAR ACTIVITIES

- Google Developer Student Club (GDSC)
- National Service Scheme (NSS)
- Passionate about dancing, travelling, and cooking
