## SUMMARY

To leverage my strong analytical skills, problem-solving abilities, and foundational knowledge in electronics to build a successful career in IT, focusing on software development, data analysis, and innovative technology solutions.

---

## PROJECTS

### Smart Irrigation System

(Mini Project)

- It is a IoT-based system to automate irrigation, optimizing water usage and maximizing crop yield.
- It Utilized soil moisture sensors, temperature and humidity sensors, and a microcontroller to monitor environmental conditions.
- From soil sensor it will detect the moisture of soil and automatically supply the water.
- Automates the irrigation process, ensuring timely and accurate water supply based on real-time soil moisture levels.
- Optimizes water usage, reducing wastage and conserving resources, especially in water-scarce regions.

### Human Following Robot

- Developed an autonomous robot capable of detecting and tracking a human target using infrared sensors.
- Implemented obstacle avoidance and path planning algorithms for safe navigation.
- Utilized Arduino microcontroller and C++ programming for hardware control and software implementation.
- Useful in hospitals for delivering medical supplies, documents, or medications while automatically following a nurse, doctor, or patient.
- Can be deployed in malls or supermarkets to follow customers and carry shopping bags, enhancing customer convenience

### Global Stock Market Analysis

- Collected real-time stock data for top 10 Hong Kong companies using yfinance and Yahoo Finance.
  - Automated data extraction for firms like AIA, CK Hutchison, and Lenovo.
  - Cleaned and merged datasets with Pandas; calculated returns, price range, volatility, and averages.
  - Visualized stock trends and correlations using Matplotlib and Seaborn.
  - Analyzed two years of data to evaluate long-term market performance and volatility.
- 

## EDUCATION

- |                                                                               |                  |
|-------------------------------------------------------------------------------|------------------|
| • B.Tech Electronics Engineering   G.H.Raisoni College of Engineering, Nagpur | (7.59)   2022-26 |
| • HSC   Taywade College, Nagpur                                               | 77.17%   2022    |
| • SSC   R.S. Mundle English School & Junior College                           | 83.80%   2020    |
- 

## SKILLS

- **Programming Languages:** Python, C, SQL
  - **Skills:** NumPy, Pandas, Matplotlib, Seaborn
  - **Software Tools:** Arduino IDE, Proteus8, Power BI
  - **Database Management:** SQL(MySQL)
- 

## CERTIFICATIONS

- **Data Analytics Course** from **Codon's Technologies, Nagpur**
  - Attended Python workshop at IIT Bombay
- 

## Languages

- English
  - Marathi
  - Hindi
  - Japanese
- 

## Interests

- Cycling
- Reading
- Watching Movies
