SUMMARY

Results-driven and detail-oriented Business Analyst with over years of knowledge in analyzing business needs, developing data-driven solutions, and driving strategic initiatives across diverse industries. Skilled in bridging the gap between business objectives and technical solutions through effective stakeholder communication, requirement gathering, and process optimization. Proficient in tools such as Excel, SQL, Tableau/Power BI. Demonstrated success in leading cross-functional teams, managing project lifecycles, and delivering impactful insights that improve operational efficiency and support decision-making.

EDUCATION

IILM University

Master Of Business Administration

Noida, India

March 2019 – Sep 2021

BP Poddar Institute of Management

Kolkata, India

BBA

May 2015 – Dec 2018

SKILLS SUMMARY

- **Languages:** SQL, MongoDB, R,
- **Tools:** Power BI, Advance Excel, Tableau, SQL
- **Data Visualization:** Tableau, Power BI
- **Soft Skills:** Communication Skills, Critical Thinking, Problem-Solving, Interpersonal Skills, Adaptability, Negotiation & Conflict Resolution

WORK EXPERIENCE

Anaptyss – KYC / Aml Analyst

April 2024 – July 2024

- Conducted due diligence on new customer accounts by verifying identities and onboarding documentation in compliance with KYC/AML regulations.
- Assessed customer and product-related risks, classifying clients based on predefined risk profiles.
- Utilized **SQL** to extract and analyse client and transaction data for risk assessment and reporting.
- Created and maintained dynamic dashboards and reports using **Power BI** and **Tableau** to track KYC metrics, AML alerts, and risk trends.

Learn bay - Internship – Business Analyst

Jan 2025 - June 2025

- Work with stakeholders (business users, clients, project managers) to gather business and system requirements.
- Analyze datasets to identify trends, patterns, and insights.
- Use tools like Excel, SQL, or Power BI/Tableau to generate reports and dashboards.
- Assist in data cleaning, validation, and visualization tasks

Genpact – Financial Analyst

April 2023 – Nov 2023

- Collaborated with business leaders to analyze financial performance, monitor KPIs, and identify opportunities for operational and cost improvements.
- Utilized **Power BI** and **Tableau** to design interactive dashboards and visualizations for tracking financial trends, variance analysis, and business performance insights.
- Wrote and optimized **SQL** queries to extract, transform, and analyze large datasets from multiple financial systems.

Tech Mahindra – Talent Acquisition Specialist

Sept 2022 - Nov 2022

- Follow up to ensure that offers are discussed with candidates in a timely manner.
- Prepare and issue offer letters, as well as initiate the necessary documentation.
- Maintain communication with candidates during the documentation phase.

PROJECT

Project: Museum Collection Insights Using SQL (April 2025)

- Analyzed 157,630 artwork records from MoMA using SQL to extract patterns in artist demographics, artwork classifications, and acquisition trends. Used Power BI to build interactive dashboards showing:
- Modern Art Focus: Over 60% of artworks were created after 1950 — indicating a modern-dominated collection. (SQL: Date-based filtering and counting)
- Top Artists: Identified 10 most featured artists, some with 500+ works in the collection. (SQL GROUP BY & COUNT)
- Artwork Types: Found that paintings and prints accounted for over 70% of the collection. (Power BI pie chart from classification counts)
- Acquisition Patterns: Detected peaks in acquisitions during the 1990s and 2000s with 20,000+ artworks added per decade.

Project: Optimizing Sales Performance & Customer Retention Through Data-Driven Insight

Sales Performance Analysis

- Analyzed sales data from 4 CSV datasets to rank 20+ sales agents by revenue and win rate.
- Identified top 5% agents responsible for 35% of total revenue.
- **Deal Success & Failure Insight**
- Created SQL logic to calculate deal conversion rates at each funnel stage.
Highlighted that **Prospecting-to-Engaging** drop-off was **28%**, suggesting a training need.
- **Churn Risk Prediction**
Applied lost deal percentage and engagement recency to flag **100+ high-risk accounts**.
Identified that **60% of churn-risk accounts** had not had a won deal in the past **90 days**.
- **Sales Pipeline Efficiency**
Computed average deal closure time by industry; found Tech industry averaged **42 days**, while Manufacturing took **60+ day**.
- Detected that deals in Stage 2 stayed **2.5x longer** than average, indicating a pipeline bottleneck.

Visualization & Reporting

- Built **6 key dashboards** including Sales KPIs, Funnel Drop-offs, Monthly Revenue Trends, and Agent Performance.
- Delivered insights in a live presentation and received a performance score above **80%**, qualifying for resume optimization and placement support.

CERTIFICATE
