SUMMARY

Business Analyst with proven experience in data-driven decision-making, cloud cost reporting, and stakeholder collaboration. Skilled in translating business needs into actionable insights using tools like Power BI, SQL, and Python. Familiar with FinOps principles, cloud service models (IaaS, PaaS, SaaS), and cost optimization strategies across AWS and GCP platforms. Adept at developing KPI dashboards, conducting trend analysis on cloud usage, and driving cost-effective cloud adoption by aligning IT, finance, and business teams.

EDUCATION

B.Tech (Civil Engineering)

National Institute of Technology Warangal • Hyderabad • 2021-2025

Intermediate

Narayana Junior College (Mpc) • 2018-2020

Secondary School Certificate (SSC)

TSTW BOYS RES SCHOOL, MIRYALAGUDA, NALGONDA • 2017-2018

EXPERIENCE

Data Analyst

mom pharmacy

June 30 – July30 2025, Hyderabad, India

- Participated in client and internal meetings to gather reporting needs and noted key discussion points.
- Created BRDs and PRDs for pricing dashboards and Excel-based automation workflows.
- Supported UAT testing by documenting test cases and validating outputs against business rules.
- Prepared internal process documentation and stakeholder summary decks in PowerPoint.
- Conducted secondary research on competitor pricing dashboards for internal benchmarks.

Data Science Intern

CODECRAFT INFOTECH

May 20 - July 20, 2025, India

- Analyzed 12 months of customer transaction data to identify churn patterns. Applied feature engineering and data validation techniques to enhance client retention insights and improve segmentation accuracy by 15%.
- Developed and optimized regression models to forecast customer lifetime value using scikit-learn and Python, improving prediction accuracy through feature engineering and hyperparameter tuning.
- Designed automation workflows for inventory and transaction reporting using Python scripts and SQL queries, improving turnaround time by 40%.

PROJECT

Inventory Management Dashboard (Power BI, SQL)

NIT Warangal March 2024 - May 2024

- Designed and implemented a real-time inventory dashboard using Power BI and SQL, improving stock visibility and replenishment planning.
- Integrated automated reporting workflows to streamline sales performance tracking and reduce manual effort.
- Delivered actionable insights on inventory turnover and order trends, improving decision-making for procurement and warehouse teams.

Hotel Review Classifier (NLP)

NIT Warangal May 2023 - July 2023

- Built an NLP-based sentiment analysis model using scikit-learn (SVM) and TF-IDF, achieving 89% accuracy in classifying hotel reviews and providing feedback insights.
- Automated data ingestion and feature engineering workflows, streamlining the classification of multilingual feedback for scalable review analysis and improved decision-making.

Supply Chain Management System (SQL & ER Modeling)

NIT Warangal May 2024 - July 2024

- Automated 5+ Power BI dashboards using Python, streamlining client reporting and improving data distribution speed by 65%.
- Cleaned and validated 25,000+ financial records with SQL, improving reference data accuracy and supporting regulatory compliance.
- Built scalable ETL pipelines and performed root cause analysis (RCA) on data inconsistencies, ensuring reliable delivery of price files and loans reference data.

SKILLS

BRD/PRD Documentation, UAT Testing, Notion (Basic), Trello (Basic), PowerPoint Presentations, Process Documentation, User Flow Mapping, Secondary Research
