SUMMARY

Motivated and results-driven final-year B.Tech (Information Technology) student with a strong foundation in analytics and statistical modeling. Proficient in Python, SQL, and machine learning techniques with hands-on experience solving real-world problems through data-driven projects. Skilled in building predictive models, performing survival analysis, and delivering actionable insights through compelling visualizations. Eager to contribute to data-centric teams and drive innovation and business impact.

PROJECTS

Customer Churn Prediction & Survival Analysis (Python, Scikit-learn,)

- Built a logistic regression model to predict customer churn using telecom data.
- Applied survival analysis to estimate time-to-churn patterns.
- Delivered insights on customer behavior to support retention strategies.

Deepfake Detection using CNN (Python, OpenCV)

- Designed a CNN-based model to detect fake videos with high accuracy.
- Used image preprocessing and deep learning to classify video authenticity.
- Evaluated the model using real-world datasets (DFD & UADFV from Kaggle).

Adidas Sales Performance Dashboard (Power BI)

- Created an interactive Power BI dashboard analyzing Adidas sales (2020–2021).
- Visualized YoY growth and product-wise performance across regions.
- Enabled quick insights for business decision-making through intuitive visuals.

EDUCATION

B.Tech Information Technology, *Madras Institute of Technology, Anna University* 2022 – Present

- GPA: 7.91/10

TECHNICAL SKILLS

Languages & Tools:

Python, SQL, MySQL, MongoDB, Git, Jupyter

Data Engineering & Analysis

Data Cleaning, EDA, Feature Engineering, Predictive Modeling (Logistic Regression, Classification), Churn & Credit Risk Modeling, Survival Analysis, CNNs

Libraries & Frameworks

Pandas, NumPy, Scikit-learn, Lifelines, Matplotlib, Seaborn, Tableau, Power BI, Excel

Soft Skills

Communication, Problem Solving, Critical Thinking, Collaboration

CERTIFICATIONS

TATA - Data Visualisation

Created business visuals for executive-level data decisions

BCG - GenAI Data Analysis

Built AI financial chatbot using Python

Deloitte - Data Analytics

Developed data dashboard in Power BI
