PROFESSIONAL SUMMARY

Results-oriented Business Analyst with proven experience in gathering and analyzing requirements, streamlining business processes, and supporting cross-functional delivery teams. Proficient in SQL, Power BI, Python, and Excel to drive data-backed decision-making. Skilled in Agile methodology, collaborating in sprint ceremonies and backlog grooming to ensure continuous delivery. Adept at drafting BRD, SRS, and MOM documents, and designing intuitive UI/UX wireframes to deliver user-centered business solutions. Strong communicator with a track record of working with global stakeholders and delivering high-impact digital projects.

EXPERIENCE

Business Analyst Intern | Futurism Technologies, INC. (Pune, India) **January 2025 - Present**

- Requirement Gathering & Documentation:** I collected requirements from clients and stakeholders, creating MOM, BRD, and SRS for projects like Adibuja, Whoop, and Ideabaaz. I used GA4 insights to track user behavior and refine documents.
- Wireframing & UI Design:** Designed wireframes for career pages, bid functionality, and RFQ modules using Wireframe.io & Visely, improving UX clarity by 30%. Integrated Power BI/Tableau dashboards to enhance design decisions.
- Agile & Scrum Execution:** Managed sprint planning, standups, and retrospectives, ensuring smooth execution. Used SQL-based reporting to track sprint efficiency and optimize workflows.
- Client Interaction & Business Solutions:** I collaborated with USA-based clients (Whoop, Masline, Kiesler, CREF) to analyze e-commerce flows, leveraging SQL and GA4 insights to drive business improvements.
- Quality Assurance & Testing:** Conducted QA on Adibuja email campaigns & UI flows, identifying and resolving UX/UI issues. Used GA4 event tracking to analyze drop-offs and optimize conversions.

Key Achievements:

- Designed wireframes for the Whoop Mobile App, enhancing product roadmap efficiency with Power BI insights.
- Conducted comparative analysis of e-commerce career pages using SQL & GA4, leading to a data-driven redesign for Adibuja.
- Led client demos & stakeholder discussions, improving solution implementation with Tableau visualizations.

Data Analyst Intern | InnoBytes Services PVT.

July 2024 – August 2024

- Analysed 15,000+ sales records using Python (Pandas, NumPy), SQL, and Excel, performing data cleaning, preprocessing, and EDA to uncover key trends like a 15% sales increase from March to April and top-selling products.
- Built interactive Power BI dashboards to visualize sales performance, customer behaviour, and regional trends, enabling data-driven decisions for inventory management and marketing optimization.
- Developed SQL queries and statistical models to segment customers, track revenue patterns, and provide actionable insights that enhanced pricing strategies and sales forecasting.

PROJECTS

E-commerce Platform Enhancement – Adibuja (Futurism Technologies)

- Collaborated with cross-functional teams to gather business requirements and authored comprehensive Business Requirement Document (BRD) and Software Requirement Specification (SRS) for the Career Page and Bid Functionality, enhancing hiring efficiency and platform interactivity.
- Conducted a competitive benchmarking analysis of 10+ e-commerce platforms to identify trends in recruitment features, contributing to strategic roadmap development.
- Designed over 8 interactive wireframes and 3 end-to-end process flow diagrams to improve stakeholder alignment and reduce iteration cycles by 30%.

Whoop Mobile App Development – USA Client (Futurism Technologies)

- Captured and documented detailed app features and functional requirements in BRD and SRS for both iOS and Android platforms, covering 20+ core functionalities.
- Created high-fidelity wireframes for 15+ mobile screens using Visely, enhancing design clarity and accelerating the UI/UX development process.
- Facilitated collaboration between UI/UX and development teams across global time zones to finalize interface elements, reducing the design-to-development gap by 25%.

RFQ (Request for Quote) Module – Adibuja E-Commerce Platform

- Developed a detailed business process flow and functional specifications for a new B2B RFQ feature, aimed at improving enterprise customer engagement and custom pricing workflows.
- Mapped the complete customer journey, identifying 5 key touchpoints and integrating them into system requirements documentation for smooth implementation.
- Defined 15+ functional use cases and acceptance criteria, improving QA test coverage and reducing post-UAT issues by 40%.

SKILLS

Business Analysis skills: Experienced in requirement gathering, stakeholder communication, business process mapping, and documentation (BRD, SRS, MOM). Proficient in QA testing (UAT), Agile & Scrum.

Technical skills: python, SQL, Power BI (DAX, KPI Analysis), Excel (Pivot Tables, Forecasting), Jira, and wireframing (Wireframe.io, Visely).

Soft skills: Strong analytical, problem-solving, and communication skills with expertise in cross-team collaboration.

EDUCATION

Mes, INSTITUTE OF MANAGEMENT AND CAREER COURSES 2022 - 2024
Masters in Computer Applications - Grades: A+ Pune, India

UNIVERSITY OF PUNE (SPPU) 2019 - 2022
Bachelors in Computer Science - Grades: A+ Pune, India
