

ADITYA MORE

PROFILE SUMMARY

To secure a challenging position as a Software Engineer where my technical skills, creativity, and problem-solving abilities can be utilized to design, develop, and maintain high-quality product / applications that meet client requirements.

WORK EXPERIENCE

- **Spark to Ideas**
Web Development Intern 2024 - PRESENT
 - Developed dynamic, database-driven websites and applications using HTML, CSS, Bootstrap, JavaScript, and MySQL. Provided technical support to clients and teams.
- **CodSoft Internship**
Web Development Intern Dec2023 - Jan2024
 - Web Development Intern at CodSoft, contributing to the development of web applications, gaining hands-on experience with HTML, CSS, JavaScript, and collaborating with senior developers to enhance website functionality and user experience.
- **Coding Ninjas Internship**
Campus Ambassador Feb2023 - PRESENT
 - Campus Ambassador at Coding Ninjas, facilitating student engagement, organizing events, and fostering a strong community presence to promote coding education and opportunities.

PROJECTS

- **Power Hub - Smart & Easy EV Charging Anywhere! (Startup Idea)**
 - Power Hub connects EV users with local charging providers, making charging hassle-free and accessible anytime, anywhere. With real-time booking, secure payments, and community-powered stations, Power Hub ensures a smooth and cost-effective charging experience while promoting green energy!
- **Beyond Doubt: Strengthening Criminal Justice with Blockchain .**
 - Leveraging blockchain technology, the initiative aims to enhance the integrity and accessibility of forensic evidence, ensuring secure, tamper-proof records. This improves the efficiency and reliability of investigations in a more dependable criminal justice system.
- **User Registration Portal**
 - Experienced .NET MVC 5 Developer who designed and developed a user portal, leading the implementation of authentication, authorization, and role-based access control. Collaborated with teams to gather requirements, optimize performance, and enhance user experience.
- **Plant Diseases Detection Using Deep Learning With Chatbot. "Sponsored By Piyush IT Services"**
 - Developed an ensemble-based deep learning model for real-time plant disease detection using Mini TensorFlow on RISC devices, integrating a Marathi-language chatbot for farmer support..

ACHIEVEMENTS

- IMPACT IDEATHON : First runner-up in IMPACT IDEATHON
- SAP (Systems, Applications and Products in Data Processing) Training
- Google Cloud Computing Foundation & Generative AI Arcade
- TCOER College : Position Training and Placement Coordinator
