About me:

Dedicated and detail-oriented professional with 1 year of experience in Software Testing (manual and automation) using Selenium WebDriver and Java. Proficient in data analysis and visualization with Power BI and Power Query Editor. Currently working in retail sales, bringing strong customer engagement skills alongside technical expertise. Certified in Power BI and SQL, with a passion for continuous learning and a goal to grow in data-driven and analytical roles. I excel at adapting to new technologies and contributing effectively to collaborative team environments.

Professional Work Experience:

Sales Executive | P.N.Gadgil Exclusive | March 2025 to Present.

- Greet and assist customers at the silver jewellery counter.
- Understand customer preferences and recommend suitable silver jewellery items.
- Provide detailed product information, including purity, weight, design, and pricing.
- Ensure silver items are well-arranged, clean, and attractively displayed.
- Monitor and maintain stock levels at the counter.
- Coordinate with inventory staff for restocking.
- Generate sales by explaining offers, upselling/cross-selling silver products.
- Handle billing processes and payment collection using POS systems.
- Maintain accurate sales records.
- Stay updated on silver purity standards (e.g., 925 sterling silver), hallmarking, and new designs.
- Explain the benefits and care instructions of silver jewellery to customers.
- Build and maintain relationships with regular customers.
- Take customer feedback and resolve issues promptly.
- Assist in seasonal and festive product displays.
- Help in organizing promotional events or offers related to silver jewellery.
- Follow store protocols for stock and cash handling.
- Ensure all transactions and exchanges are properly documented.
- Work closely with other sales executives and showroom staff.
- Report daily sales and customer feedback to the department manager.

Data Visualisation | Empowering Business with effective Insights Job Simulations | Tata Group | Jan 2025

- Data Analysis (40%): Analyze datasets using tools like Power BI, identify trends and insights, and prepare data for effective visualisation
- Dashboard Creation: Design interactive, user friendly dashboards with KPIs and dynamic elements to allow deeper data analysis.
- Presentation (20%): Communicate data insights clearly to stakeholders with compelling visuals ensuring the data is actionable and easily understood.

Software Tester (Manual & Automation) | NoviCart India | DNS Creative Products Pvt Ltd |
March 2022 - February 2023

- Analyze software requirements and functional specifications.
- Design and execute detailed manual test cases.
- Perform various types of testing: Regression Testing, System Testing, Functional testing
- Identify, document, and report bugs or issues.
- Maintain test plans, test case documents, and test reports for reference and audit.
- Develop reusable automated test scripts using Selenium WebDriver and Java.
- Regularly update and maintain automated test scripts based on new application changes.
