OBJECTIVE:-

Detail-oriented and analytical-minded Statistics student with a strong foundation in statistics, data mining, and predictive modeling. Passionate about data-driven insights to solve complex problems and support decision-making. Seeking an entry-level role as a Data Analyst to apply statistical techniques, data visualization, and machine learning to real-world challenges.

INTERSHIPS:-

- Data Science and Machine Learning Intern at AIS Solutions Pvt. Ltd, Pune
- Data Analytics Intern at YBI foundation (Online)

SKILLS:

- Programming Languages:-
 1. Python (Pandas,NumPy,Matplotlib,Seaborn,Scikit-learn)
 2. R
 3. SQL
- Data Visualization Tools:- Power BI,Tableau,MS Excel
- Machine Learning (Supervised and Unsupervised)
- Regression Analysis
- Multivariate Analysis
- Time Series
- Hypothesis Testing
- Statistical Inference
- Data Mining
- Probability Distribution

CERTIFICATION:-

- Python: [View Certificate](#)
- Data Science and Machine Learning [View Certificate](#)
- Data Analytics [View Certificate](#)

AWARDS:-

Awarded as Best Coder at AIS Solutions Pvt Ltd,Pune

SCHOLARSHIP:-

Received merit cum need based scholarship of Lila Poonawala Foundation

EDUCATION:-:-

Institute	Board/University	Examination	Percentage	Year of passing
Tuljaram Chaturchand College of Arts, Commerce and Science, Baramati	Savitribai Phule Pune University	M.Sc. Statistics	82.48%	2025
Yashwantrao Chavan Institute of Science, Satara	Shivaji University, Kolhapur	B.Sc. Statistics	85.28%	2023
Maharaja Sayajirao Junior College, Satara	Maharashtra State Board	H.S.C	71.38%	2020
Holy Convent English Medium School,Umbraj	Maharashtra State Board	S.S.C.	94.00%	2018

PROJECTS:-

- **Approach of People towards Electric Vehicles:-**

Applied Fisher's Exact Test to check whether there was association between willingness to buy electric vehicles and income

Applied Chi-Squared Test to check association between occupation and how likely people want to buy EV

Applied One Sample Proportion test to check proportion of people satisfied with the government schemes

- **Bike Sharing Demand Prediction:-**

Applied different Machine Learning Algorithmns to predict bike sharing demand and calculated prediction accuracies.

Performed feature selection and recalculated the accuracies of every algorithm wherein Random Forest showed good result of all the algorithmns

- **Statistical Analysis of Stay Duration of Patients in Hospital:-**

Used Poisson regression to predict stay duration of patients in hospital as response variable was a count data and checked its adequacy.

Applied non- parametric Kruskal-Wallis test to check significance of Stay duration between independent groups.
