EDUCATION

Savitribai Phule Pune University

Bachelor of Engineering in Electronic and Telecommunication - Distinction

Pune, Maharashtra, India

2021 - 2025

Savitribai Phule Pune University

Honors in Data Science – Specialization Program - Distinction

Pune, Maharashtra, India

2023 - 2025

TECHNICAL SKILLS

Tools: BRD, FRD, Agile, Waterfall, SDLC, Wireframing, Requirement Gathering, User Story, Case Study

Data Analytics: Power BI, Excel, ETL, EDA, KPI Tracking, Data Visualization

Programming & Querying: Python, Pandas, NumPy, Matplotlib, SQL

WORK EXPERIENCE

Business Analyst, Intern

Kasnet Technology, Pune, India

December 2023 - February 2024

- Gathered business requirements and documented BRD/FRD for banking datasets.
- Automated reconciliation reports, reducing report generation time by 75% (from 5-7 hours to 1-1.5 hours).
- Conducted data validation and breaks analysis to enhance compliance with regulatory reporting standards.
- Collaborated with cross-functional teams, presenting data-driven insights to business stakeholders for decision-making by 30%.

PROJECTS

DISASTER MANAGEMENT DASHBOARD (Product – MVP)

[Source Code](#)

January 2025 – JUNE 2025

- Developed an AI-powered dashboard for disaster prediction using Explainable AI (XAI) to enhance transparency and interpretability by 50 from normal dashboards.
- Implementing ML models to predict disasters, considering 10 M+ historical weather records.
- Integrating real-time alerts by analyzing 10,000+ social media posts daily, enhancing early warning.
- Built geotagging and historical analytics covering over 150+ disaster-prone locations in India to identify high-risk zones.
- Optimized backend performance, reducing API response time by 30 using Next.js and Node.js and designed a responsive dashboard UI using React.js and Next.js, ensuring seamless user interaction.

INVESTMENT TRADE RECONCILIATION & RISK REPORTING

[Source Code](#)

December 2023 - February 2024

- Automated trade reconciliation, resolving 95% of trade breaks, fails and reducing manual settlement efforts by 70%.
- Developed a Power BI dashboard for real-time risk monitoring, improving trade compliance and settlement accuracy by 40%.
- Automated exception reporting, reducing reconciliation errors by 50% and minimizing financial discrepancies.

SENTIMENT ANALYSIS FOR PRODUCT FEEDBACK

[Source Code](#)

September 2023 - November 2023

- Built a sentiment classification model using K-Nearest Neighbors (KNN) and TF-IDF vectorization, achieving 85% accuracy.
- Utilized Twitter API for real-time sentiment tracking, providing actionable insights for consumer sentiment analysis.
- Implemented data preprocessing techniques, improving classification performance by 20%.

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals – Certified by Microsoft.
- Supervised Machine Learning: Regression and Classification – DeepLearning.AI and Stanford University (Coursera).
- BCG Data Science Job Simulation (Forage).
