Education

Maharaja Agrasen Himalayan Gharwal University

2021- 2024

Bachelor of Computer Application

Uttarakhand

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Discrete Database Systems
- Software Methodology
- Object-Oriented Programming
- Mathematics
- Operating Systems

Experience

Saiket Systems

Feb 2025 – March 2025

Business Analytics Intern

Nagpur, Maharashtra

- Conducted in-depth **customer churn analysis** for a telecom company as part of a Business Analytics Internship at Saiket Systems.
- Completed **four structured tasks** involving data cleaning, exploratory data analysis, feature engineering, and churn prediction modeling.
- Utilized tools like **Python (Pandas, Matplotlib, Seaborn), machine learning models**, and data visualization techniques to identify key churn indicators.
- Delivered actionable insights to help reduce customer churn, enhancing **retention strategy recommendations** for telecom services.

Eagletfly Solutions

Sep 2024 – Jan 2025

Data Science Intern

East Patel Nagar, Delhi

- Completed a Data Science Internship at **Eagletfly Solutions**, working on multiple real-world projects including **Iphone reviews Prediction using NLP** and **Uber Data Analysis**.
- Applied **Python, SQL, and NLP models** for data preprocessing, modeling, and analysis.
- Created **interactive dashboards using Tableau** to visualize insights and support data-driven decision-making.
- Gained hands-on experience in **machine learning, data wrangling, and end-to-end model development**.

Orison Technologies Private Limited

Aug 2024 – Sep 2024

Machine Learning Intern

Raipur

- Completed a **Machine Learning Internship at Orison Technologies**, working with **real-time data** on multiple ML and deep learning projects.
- Built and deployed an **Iris flower classification model using Django**, and implemented **Linear Regression** on synthetic data.
- Developed an **Image Classification project (Dogs vs. Cats)** using **Convolutional Neural Networks (CNNs)** with Keras.

- Gained hands-on experience in **model deployment, deep learning, and end-to-end ML workflows.**

Projects

Fraud Detection on Financial Transactions

July 2025

Built a machine learning model to detect fraudulent financial transactions, analyzing transaction patterns, amounts, and account balances. Used Python (Pandas, Scikit-learn, Matplotlib, Seaborn) for data cleaning, feature engineering, modeling, and visualizations. Identified key fraud predictors and provided actionable recommendations to reduce fraud risk.

NEET Exam Data Analysis | *Python, Jupyter Notebook*

March 2025

Analyzed NEET exam data to uncover insights on student performance, cutoff trends, and state-wise comparisons. Used Python (Pandas, Matplotlib, Seaborn) for data cleaning, exploratory analysis, and visualizations. Identified patterns in scores, ranks, and qualifying criteria, aiding in academic and policy-oriented decision-making.

Spam-Ham Mail Detection | *NLP*

December 2024

Developed a spam detection model using NLP techniques to classify emails as spam or ham using LSTM and GRU networks. Cleaned and preprocessed textual data with stopword removal, stemming, and regular expressions to enhance model performance. Used NLTK for natural language processing and TensorFlow for building and training deep learning models. Visualized message length distribution and category ratios through pie charts and statistical summaries to support analysis.

Road Accident Analysis | *Python, Jupyter Notebook*

February 2025

Conducted an in-depth analysis of road accidents in million-plus cities using real-world datasets. Identified top cities with high accident rates (e.g., Chennai, Delhi, Jabalpur) and key contributing factors like road features and traffic violations. Created visual dashboards using bar plots, count plots, and pivot tables to present actionable insights for policymakers.

HR Analytics Dashboard | *Tableau*

October 2024

Developed an interactive HR analytics dashboard using Tableau to visualize employee demographics, job roles, performance, and attrition trends. Uncovered key insights such as high attrition in Sales and gender-based turnover differences. Used bar charts, heatmaps, and donut charts to identify factors influencing employee satisfaction and retention.

Technical Skills

Programming Languages: Python

Data Analysis & Visualization: Tableau, Advanced Excel, Power BI, Matplotlib, Seaborn

Machine Learning & Libraries: Scikit-learn, TensorFlow, NLTK

Database Management: SQL (PostgreSQL, SQL Server)

Platforms: Jupyter Notebook

Soft Skills: Problem-solving, Data storytelling, Analytical thinking, Data modelling

Course And Webinar

Successfully completed a certified course titled "Artificial Intelligence" and participated in a webinar focused on the latest AI industry applications.
