Objective

To enhance my professional skills, capabilities and knowledge in an organization which recognizes the value of hard work and trusts me with responsibilities and challenges.

Experience

- Cerence** December 2021 - August 2022
Software engineering associate
 - Developed and maintained frontend solutions using GDML and typescript to enhance the infotainment system for Jaguar landrover (JLR).
 - Collaborated with cross functional teams to resolve technical issues in real time improving system efficiency.
 - Provided technical support for system updates and system troubleshooting, enhancing user experience for JLR's infotainment system.
 - Applied agile methodologies to ensure timely project delivery and adapt changes in project requirement.
- Fusionhawk** Mar 2025 - June 2025
RPA intern
Developed automation scripts using Python to streamline data handling, form submissions, and web interactions across platforms like Zoho and LinkedIn.

Applied backend logic principles (loops, conditionals, file handling) to drive Excel-based workflows and dynamic input processing.

Integrated Gemini LLM to build smart automation flows, improving task efficiency and reducing manual backend operations.

Education

- Savitribai phule pune University** 2021
BE- Electronics and telecommunication
Cgpa - 6.61
- Fergusson college pune** 2017
12th
62%
- St.Joseph high school Pashan Pune** 2015
10th
91.4%

Skills

- Programming languages - C, C++, Core java, Python
- Salesforce administration
- Database- RDBMS fundamentals,MySQL
- Web development - Html, CSS, javascript
- Agile development - Scrum
- Problem solving and debugging - Issue resolution, bug tracking

Soft Skills

- Good communication, Problem solving , Teamwork ,Time management

Certification

- Salesforce admin and development - Nov 2022

- Java full stack course at RS Softech , Pune - April 2024

Projects

- **Jaguar land rover**

Worked on frontend technology using programming languages - GDML and Typescript.

Jaguar land rover(JLR) - Worked on infotainment system in JLR cars

- **BE project -Multipurpose rover using voice control and AI**

The main objective of the project is to build a wireless robot for multipurpose application using AI.

- Improved quality, efficiency and security.
- Ability to work in any hostile environment.
- Enhanced operational efficiency in hostile environments bu utilising AI driven solutions for improved automation and security.

Interests

- Travelling
- Learning latest technologies
- Drawing and listening to music
