CAREER OBJECTIVE

Aspiring Data Analyst eager to apply analytical skills and proficiency in data visualization tools in a dynamic entry-level role. Ready to contribute to a team, apply academic knowledge, and enhance expertise in real-world data analysis.

EDUCATION

Bachelor of Technology in Mechanical Engineering

Aditya College of Engineering and Technology

Diploma in Branch

Government Polytechnic College, Anaparthi

June 2020 – May 2023

CGPA: 6.39

April 2017 – May 2020

Percentage: 66.66%

TECHNICAL SKILLS

- **Programming Languages:** Python, C
- **Python Libraries/Frameworks:** NumPy, Pandas, Scikit-learn, Seaborn
- **Database:** SQL
- **Data Visualization Tools:** Tableau, Power BI, Excel
- **Software Tools:** M.S Office
- **Engineering Software:** Solid Edge
- **Operating Systems:** Windows

PROJECTS

Bank Management – October 2023 – December 2023

- Developed a bank management system utilizing SQL for database design and management, achieving a increase in data retrieval speed and reduction in query execution time.
- Implemented Python for backend development, resulting enhancement in system scalability and a 30% decrease in server response time.
- Executed CRUD operations implementation, leading to improvement in transaction processing efficiency and decrease in error rates.
- Structured databases for efficient data management, optimizing storage capacity and enhancing data accessibility.
- Engineered a robust system for handling customer information, transactions, and account details, resulting in a 20% decrease in data redundancy and increase in data security.

Car Price Prediction – June 2023 – September 2023

- Established a car price prediction model with a Python Flask backend, achieving an accuracy in forecasting vehicle prices based on historical data.
- Implemented HTML and CSS for frontend development, resulting in a 30% improvement in user interface responsiveness and engagement.
- Applied machine learning techniques, including scikit-learn and TensorFlow, to train the prediction model, reducing prediction errors compared to baseline models.
- Deployed the web application using Flask deployment and Heroku, achieving a uptime rate and ensuring seamless accessibility for users.
- Demonstrated expertise in data preprocessing and model training, optimizing feature engineering processes to achieve a 20% reduction in training time while maintaining prediction accuracy.

CERTIFICATIONS

- Certified in Python, MS Excel, MySQL, and Tableau for Data Analysis – Great Learning.
- Completed Accenture North America's Data Analytics and Visualization program – Forage.
- Attained a Certificate for Completion of Python.
- Finished Automotive-2 Wheeler Foundation course at APSSDC SIEMENS t-SDI.
