Career Objective

Computer Science graduate passionate about Data Analytics & AI, with hands-on experience in analyzing large datasets, building ML models, and driving data-driven decisions. Skilled in Python, SQL, and business intelligence tools. Seeking an Analyst Internship to leverage analytical skills in solving real-world business problems, particularly in fraud detection, credit risk, and strategic growth.

Education

Sir CR Reddy College of Engineering , Computer Science - GPA: 7.93/10	2020 – 2024
Sri Chaitanya Junior College , MPC - GPA: 9.6/10	2018 – 2020

Internship Experience

Machine Learning Intern

Chip Electronics May 2023 – June 2023

- Built a credit card fraud detection system using Logistic Regression and Decision Trees, reducing false positives by 22% and achieving 96% accuracy.
- Performed data cleaning, feature engineering, and ROC-AUC evaluation using Python (Pandas, NumPy, scikit-learn).
- Applied Machine Learning models to real-world datasets, enhancing data analysis and model evaluation skills.

Projects

Credit Card Fraud Detection using Machine Learning | *Python, Machine Learning*

- Developed a fraud detection system using supervised machine learning techniques (e.g., Logistic Regression, Random Forest) on a publicly available dataset.
- Achieved an accuracy of 96% in identifying fraudulent transactions while minimizing false positives.
- Processed and analyzed over 100,000 transaction records, optimizing model performance through feature engineering and hyperparameter tuning.

Fake Face Detection | *OpenCV, Python, TensorFlow*

- Built a fake face detection model using Local Binary Patterns (LBP) and SVM classifiers to analyze facial textures.
- Achieved a detection accuracy of 93% on a dataset containing 5,000 real and synthetic facial images.
- Improved detection efficiency by reducing model training time by 20% through optimized image preprocessing techniques.

Skills

Languages : Python(NumPy, Pandas)

Web-Technologies : HTML5, CSS3

Data Tools: Excel (Pivot Tables, VLOOKUP)

Database Technologies : SQL

Machine Learning: Logistic Regression, SVM,

Other : Concepts of Object-Oriented Programming, SDLC

Certifications and Activities

Machine Learning Certification from Chip Electronics

Certified in Python skills from HackerRank

SQL for Data Analysis – Coursera
