Reading

PROFILE

Detail-oriented and self-driven web developer with a strong foundation in HTML, CSS, and JavaScript. Eager to contribute to innovative projects and grow my skills in a dynamic environment

PROJECTS

DIFFIE HELLMAN KEY USING CLOUD • JAN 2022

In this project we are trying to use Diffie hell man algorithm with cloud system as well as makes file transferring more securing using this algorithm so it will use user as security purpose as well it will make a data more secure

VEDAS RELATED SEARCH ENGINE •AUG 2022

It is kind of search engine where user can search Sanskrit shloka with there meanings as well as they can listen and read brief information of any kind of literature

SPEECH EMOTION RECOGNITION • JAN 2023

Identifying emotion expressed in spoken language

DATA VISUALIZATION • AUG 2023

Create visual representation of data to communicate finding and Insights effectively

TASK MANAGER APPLICATION •JAN 2024

In this project, you will craft a task management application using Angular v17. This task manager will allow users to log in/log out, add, edit, view, and mark completed tasks.

QUIZE APPLICATION •AUG 2024

We will be creating a **Quiz application using the Angular framework**. This app will allow users to answer multiple-choice questions and view their results interactively. We'll use Angular Material for a polished UI and implement responsive design to ensure it looks great on all devices. The application will include features like dynamic question rendering, real-time feedback, and score calculation.
