EDUCATION

Thakur College of Engineering and Technology
Bachelor of Technology in Artificial Intelligence and Data Science

Mumbai, Maharashtra
Nov. 2022– May 2026

Bharatiya Vidya Bhavans
Science

Mumbai, Maharashtra
Aug. 2020 – June 2022

EXPERIENCE

Backend Developer
GNZY

November 2024 – December 2024
Mumbai, Maharashtra

- Streamlined backend codebase, reducing technical debt by 25percent and improving system performance by 15percent.
- Designed and tested 20+ APIs, achieving 100percent functionality and data accuracy within project deadlines.

Data Scientist Intern
Evoastra Ventures Pvt Ltd

July 2024 – August 2024
Mumbai, Maharashtra

- Conducted credit risk analysis on 10,000+ loan applications, achieving 85percent accuracy.
- Developed 3 machine learning models to optimize loan processing, reducing approval time by 15 percent.
- Delivered insights from web-scraped data for car brands like Tata, Hyundai, and Maruti, influencing key client decisions.

Backend Developer
Tcet Open Source

June 2023 – July 2024
Mumbai, Maharashtra

- Reduced response time for critical system functions by 30 percent through database optimization using MongoDB.
- Built scalable backend services handling 1,500+ daily requests, ensuring system reliability.

PROJECTS

TrustED: AI-Based Accreditation Sytem | *Python, Pandas, Tkinter*

Jan 2025-Present

- Building a desktop app using Python and Tkinter to help colleges evaluate NBA Self-Assessment Reports.
- Automates data validation and report generation, aiming to cut manual work by 50–60%.
- Designed for educational institutions to streamline accreditation and improve compliance..

Imaginify | *Next.js, Typescript, Shadcn UI, Payment Gateway*

December 2024

- An AI-powered image SaaS platform used by hundreds of users for advanced image transformations, including restoration, object removal, generative filling, and background removal
- Integrated Razorpay and Clerk, enabling secure payment processing for credit purchases and seamless authentication for a growing user base.
- Engineered a responsive and user-friendly UI/UX using Shadcn UI and TailwindCSS, ensuring a smooth experience across all devices.

WorkSmart AI | *Node.js, React.js*

October 2024

- Developed a SaaS platform for monitoring remote employee productivity, task scheduling, and generating AI-powered meeting summaries.
- Designed scalable backend services to ensure seamless task updates and real-time user interaction.
- Optimized for office and hiring managers to streamline workflows and improve team efficiency.

TECHNICAL SKILLS

Languages: Python, JavaScript, Typescript, HTML/CSS

Frameworks: React.js, Node.js, Express.js, Flask, Streamlit, Next.js

Developer Tools: Git, GitHub, Jupyter Notebook, Visual Studio, My SQL, MongoDB, Postman, Power BI, Tableau

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Beautiful Soup, Requests

Open Source Head

Mindbenders TCET

August 2024 – Present

Mumbai, Maharashtra

- I manage and contribute to blogs and projects by deploying them on the website, ensuring they are well-maintained and up-to-date. My role involves fostering collaboration, maintaining code quality, and promoting open-source initiatives.

RESEARCH & PUBLICATIONS

AI for Detecting Greenwashing in Corporate Sustainability Reports

Research Project

Under Review

Jan 2025-April 2025

- Conceptualized and designed a web-based system utilizing NLP models to identify misleading corporate sustainability claims.
- Defined workflows, UI mockups, backend logic, and data architecture for features like claim verification, scorecard exploration, and community reporting.
- Aimed to reduce manual greenwashing detection by up to 70%, enhancing transparency and enabling faster assessments.
- The research is under the guidance of Dr. Anand Khandare (Associate Dean of Planning and Operations for Digital Resources, TCET).

TrustED: AI-Powered Accreditation System

Research Project

In-Process

Jan 2025 - Present

- Developing **TrustED**, an AI-driven system that streamlines accreditation processes in higher education.
- Uses NLP and machine learning to evaluate Self-Assessment Reports and provide accreditation readiness scores and insights.
- Enhances efficiency, reduces manual effort, and offers a transparent alternative to traditional accreditation methods.
- The research is under the guidance of Dr. Anand Khandare (Associate Dean of Planning and Operations for Digital Resources, TCET).
