## PROJECTS

### Sales Data Analyzer

- **Objective:** To identify sales trends and optimize inventory management.
- **Key Contributions:**
  - Designed 15+ SQL queries to analyze 1,000+ financial records, reducing report generation time by 40%.
  - Created interactive dashboards using Pandas and Matplotlib to visualize regional sales performance.
  - Developed using **Python , SQL , Excel**
  - **Outcome:** Enabled data-driven decision-making for a simulated retail business.

### Marathi Text-to-Speech (TTS) Using AI4Bharat's IndicTTS

- **Objective:** To develop a TTS system for low-resource Indian languages.
- **Key Contributions:**
  - Collected and preprocessed 500+ Marathi news articles cleaned text (removing special chars, normalizing spellings), and structured into **JSON format** for model training.
  - Fine-tuned AI4Bharat's IndicTTS model using Hugging Face, achieving 85% speech clarity in user tests.
  - It is developed using Python, Hugging Face (Transformers), AI4Bharat's IndicTTS, JSON
  - **Outcome:** Demonstrated the potential of open-source tools for Indic language AI applications.
