Education

SDM Institute of Technology (VTU University)

Bachelor of Engineering in Electronics and Communication

Dec. 2020 – May 2024

Ujire, Karnataka

CGPA – 7.5

Certifications

- Python Programming by Great Learning.
- SQL for Beginner by Great Learning.
- C programming By Great Learning.
- VLSI Design - SOC by Infosys Springboard.

Experience

MAXVY Technologies Pvt Ltd.

Nov 2024 - Present

FPGA Design Intern

Bengaluru, Karnataka

- Learning Development Tools: Spend time understanding FPGA design tools like the Xilinx Vivado tool used by the company.
- Review the documentation and tutorials related to the FPGA design flow, including RTL design, synthesis, implementation, and testing.
- Working on synthesizing a design and performing place-and-route tasks.

Eklakshya Innovations Lab Pvt Ltd.

Sep 2023 – Oct 2023

RTL Design Intern

Hubli, Karnataka

- Understand Design Specifications:
Interpret the requirements and specifications of the digital circuit to be designed.
- RTL Coding:
Write RTL code for digital circuits using hardware description languages like Verilog or VHDL.
- Functional Verification:
Create testbenches and run simulations to verify that the digital circuit behaves as expected.
- Synthesis:
Convert RTL code into a gate-level netlist using synthesis tools, ensuring the design meets performance and area constraints.

Projects

Automatic Path following Robot. | Embedded C, Arduino IDE.

- Designed and Built Robot Hardware:
- Developed and Implemented Navigation Algorithms
- Prototyped, Tested, and Refined.

Web Scraping | Python, Pandas, Jupyter, Microsoft Excel

- Developed Web Scraping Scripts:
- Used Python libraries such as BeautifulSoup and Scrapy to extract data from web pages.
- Implemented Data Parsing and Storage

Technical Skills

1. Python Programming
2. SQL
3. C Programming
4. Verilog HDL

EDA TOOLS

1. Cadence Genus and Virtuoso.
2. Xilinx Vivado.
3. Jupyter Notebook.
4. EDA Playground
