EDUCATION

Vignana Bharathi Institute of Technology

B.Tech in Information Technology

CGPA: 7.3

Hyderabad, India

Feb 2020-June 2024

PROFILE SUMMARY

Data-driven and detail-oriented Data Analyst with a strong foundation in statistical analysis, data visualization, and SQL. Skilled in transforming raw data into actionable insights to support strategic decision-making. Proficient in tools like Excel, Python, and Power BI. Eager to apply analytical skills to solve real-world business problems.

WORK EXPERIENCE

The Business Reserach Company

Sep 2024-Apr 2025

Market Research Analyst

- Collected and compiled data from various market sources to support business insights
- Cleaned, organized, and sorted large datasets using Excel and SQL to ensure accuracy and usability
- Worked with relational databases to retrieve, manage, and update data efficiently
- Created interactive dashboards and visual reports using Power BI and Tableau for stakeholder presentations
- Collaborated with team and manager to provide timely and actionable insights for decision-making.
- Provided weekly data summaries and ad-hoc reports to senior management for decision-making

ACADEMIC PROJECTS

Customer Churn Prediction (Self Project)

- Used Python and Excel to analyze customer data and identify key churn indicators
- Created a logistic regression model achieving 85% accuracy
- Presented actionable insights to reduce churn by targeting high-risk segments

Sales Dashboard using Power BI

- Developed a dynamic dashboard for regional sales performance using Power BI
- Integrated sales, profit, and customer data to identify underperforming areas
- Helped simulate "what-if" scenarios for monthly sales forecasting

Crime Type and Occurrence Detection

- Engineered a platform for the users to estimate which type of crime contributes the most. Allows the users to detect the crimes that occurred the most so to be aware of them.
- Machine learning algorithms such as KNN,K-Means are implied in this work in order to classify among various crime patterns and the accuracy achieved was completely high.
- Random Forest Classifier data mining methods gave high performance.
