PROFILE SUMMARY

B.Tech graduate in Electronics and Communication Engineering from VIT Chennai (2025) with a CGPA of 8.09. Skilled in Python, SQL, Power BI, and data analysis, with hands-on experience in building dashboards and transforming raw data into meaningful insights. Looking forward to contributing my knowledge and data-driven decision-making skills to grow in a fast-paced learning environment.

SKILLS

Languages: Python, C/C++, SQL

Tools: Microsoft Power BI, VS Code, Jupyter Notebook, MySQL Workbench, n8n, MATLAB, R Studio, Canva

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Concepts: Data Cleaning, Data Wrangling, Data Visualization, ETL Pipeline, EDA, Dashboards

WORK EXPERIENCE

InstaPrepsAI | (Data Engineering Intern)

2025(July) - Present

- Built and maintained automated data pipelines using Python and SQL to manage a student database of over 1,00,000+ entries.
- Developed scripts for cleaning and transforming messy Excel data into structured tables.

InstaPrepsAI | (Product Engineering Intern)

2024(Dec) - 2025(Feb)

- Conducted research on innovative features to enhance platform capabilities and align with user needs.
- Contributed to documentation and knowledge sharing for seamless product updates and team collaboration.

IEEE Club VITC | (Graphic Designer)

2022 - 2024

- Designed posters, flyers, and digital content for club events and promotions, leading to a 30% average increase in event participation.
- Coordinated with event teams to deliver designs within 24-hour timelines.

PROJECTS

Cricket Performance Visualization Using Power BI and Official Data Sources | (Statistics) **2025**

- Collected and cleaned match data from multiple official sources.
- Designed a fully interactive dashboard with filters for player names and match types (ODI, T20, Test).
- Enabled users to compare player stats and trends across different formats.

Amazon Sales Data Analysis Using Python | (Python)

2025

- Cleaned and processed 20,000+ rows of Amazon sales data using Pandas and NumPy.
- Created insightful visualizations with Matplotlib and Seaborn to uncover sales trends, regional performance, and product category insights, aiding strategic decision-making.

Digital Vending Machine in Verilog | (FPGA, VLSI)

2024

- Designed a vending machine using Verilog HDL, implementing a Mealy state machine to achieve 100% accuracy in coin recognition and seamless item dispensing during simulations.
- Achieved 100% simulation accuracy on ModelSim with efficient state transitions and seamless change handling, ensuring zero design errors.

EDUCATION

Vellore Institute of Technology, Chennai

*B.Tech - Electronics and Communication Engineering - **CGPA: 8.09***

2021 – 2025

Chennai, Tamil Nadu

Vivekananda Vision Ideal Public School

*HSC - Science - **Percentage: 77.8%***

2018 – 2020

Aurangabad, Bihar

Bright Life Public School

*SSC - General - **Percentage: 89.4%***

2016 – 2018

Rafiganj, Bihar

CERTIFICATIONS

Tata Group- Data Visualisation: Empowering Business with Effective Insights

2024

Oracle Database Design and Database Programming with SQL

2023

MAVEN SILICON (centre of excellence in VLSI)
