Pune, Maharashtra, India

SUMMARY

Detail-oriented QA Engineer with 3 years of experience in manual and automation testing across web and mobile applications. Skilled in designing and executing test cases, identifying defects, and ensuring high-quality software delivery. Proficient in Selenium, Appium, Core Java, API testing, SQL, and Jira. Experienced in test automation framework development, bug tracking, and reporting. Adept at working in Agile/Scrum environments to improve software reliability and performance. Strong analytical and problem-solving skills with a passion for delivering seamless user experiences.

PROFESSIONAL SKILLS

Manual Testing	Automation Testing	Selenium	Core Java
API Testing	JIRA	Functional Testing	Agile Methodology

WORK EXPERIENCE

QA ENGINEER

Invicta India Pvt Ltd, Goa

(Jan 2025 – July 2025)

Project I: PlayCrypto/Winbaji – Online Casino Gambling Games Platform

- Role: QA Engineer
- Developed a comprehensive Test Plan defining testing scope, objectives, resources, timelines, and deliverables to align with project goals.
- Created and maintained detailed Test Case Documents encompassing both functional and non-functional scenarios to ensure thorough test coverage.
- Conducted manual testing of casino games to validate gameplay mechanics, payment workflows, and user experience across browsers and platforms.
- Executed daily regression and sanity testing to maintain platform stability during continuous updates and deployments.
- Performed API testing using Postman to verify backend integrations, payment APIs, game logic, and transaction consistency.
- Conducted mobile app testing on Android and iOS, ensuring performance, UI/UX consistency, responsiveness, and functional accuracy.
- Designed and implemented a robust test automation framework using Selenium, Java, TestNG, and Maven to accelerate testing cycles and improve reliability.
- Collaborated with cross-functional teams to identify, document, and manage defects using JIRA, ensuring timely resolution.
- Conducted load and performance testing to assess system behavior under varying traffic conditions.

Project II: Friends2Talk – Social Networking App

- Role: QA Engineer
- Performed end-to-end functional and non-functional testing to validate core features such as user registration, messaging, video calling, and friend recommendations.
- Conducted cross-device testing on Android and iOS platforms to ensure compatibility, performance, and consistent user experience across devices and OS versions.
- Validated UI/UX design elements, responsiveness, and usability to align with user expectations and design standards.
- Executed exploratory testing to uncover edge cases and ensure app robustness.
- Identified and tracked bugs using JIRA, and worked closely with developers to reproduce and resolve issues quickly.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives to ensure continuous testing and delivery.

(Aug 2023 - Nov 2024)

QA Engineer

Block Stars Pvt Ltd, South Korea

Project: Kingpot – Online Casino Gambling Games Platform

- Conducted comprehensive end-to-end testing across casino game modules, including slot, card, and roulette games, ensuring stable gameplay and accurate outcomes.
- Validated the Bet History module, ensuring accurate recording and retrieval of user bets, timestamps, results, and payout calculations.
- Performed detailed testing of Game Statistics dashboards, verifying data accuracy for KPIs like total plays, win/loss ratios, player rankings, and session analytics.
- Collaborated with product and backend teams to test random number generation (RNG) logic, ensuring fairness and compliance with regulatory standards.
- Verified real-time data syncing between frontend game clients and backend services, particularly during high-volume gameplay scenarios.
- Tested various in-game events and bonuses, including free spins, jackpots, and loyalty rewards, ensuring correct triggering and payout logic.
- Validated wallet balance updates after game completion, accounting for win/loss outcomes, currency conversion, and promotional deductions.
- Conducted session management testing including user login persistence, multi-device login handling, and session expiry validation.
- Participated in compliance and certification readiness testing to meet online gambling regulations for responsible gaming, data privacy, and game fairness.
- Tested localization and currency support across international markets to ensure correct formatting of numbers, currency symbols, and translations in the gaming interface.
- Engaged in error-handling testing, simulating server disconnects, interrupted payments, and crash scenarios to ensure graceful recovery and user notification.

Software Development Engineer in Testing 1

GeekyAnts Pvt Ltd, Bengaluru

(July 2022 - July 2023)

Project: MyFojo – Instamart Food Ordering Application

- Designed and implemented a robust mobile automation framework for iOS using Appium, Java, TestNG, and Maven, enabling reliable and scalable test execution.
- Developed and maintained automated test scripts for key features such as product search, cart updates, order placement, and order tracking.
- Performed smoke, sanity, and regression testing across multiple app builds to ensure stability and identify regressions early.
- Executed non-functional testing, including performance, usability, and responsiveness checks, to optimize the end-user experience.
- Conducted cross-device and OS-level testing to validate app compatibility across various iOS devices and versions.
- Authored and maintained a detailed test case repository, ensuring high coverage of functional and edge-case scenarios.
- Used Git for version control, managing branches, commits, and pull requests to ensure collaborative and traceable automation development.
- Collaborated with developers and product teams in an Agile environment, participating in sprint activities, story grooming, and QA reviews.
- Used Charles Proxy and debugging tools to inspect API responses, validate request handling, and troubleshoot client-server issues.
- Logged, tracked, and managed defects using JIRA, coordinating resolutions and verifying fixes during the development lifecycle.
- Created test summary reports and provided risk assessments to stakeholders before production releases.

EDUCATION

Bachelor Of Engineering in Computer Science (2019 - 2022)

Diploma in Mechanical Engineering (2013 - 2016)

SSC (2013)

CERTIFICATIONS

Certified Software Testing Engineer (CSTE) – Advanto Learning Institute Pune.
