

FARJAD SIDDIQUI

PERSONAL PROFILE

- **Results-driven Business Analyst** with nearly 3 years of experience in driving end-to-end project lifecycle management, specializing in requirement gathering, stakeholder collaboration, and agile delivery within fast-paced IT environments. Proven track record in enhancing **project delivery timelines by up to 30%** through effective cross-functional team coordination and process improvements.
- Adept at **translating complex business needs into actionable technical requirements**, facilitating seamless communication between business units and development teams. Skilled in conducting gap analysis, process mapping, and user story creation to ensure precise scope definition and minimize requirement-related **defects by up to 40%**.
- Working closely with product owners, scrum masters, and QA teams to improve sprint velocity and overall team efficiency, **contributing to a 50% increase** in sprint output by driving focused sprint planning, backlog grooming, and retrospective sessions.
- Strong expertise in stakeholder management and knowledge transfer, mentoring and guiding junior analysts and interns to build team capabilities and support organizational growth. **Successfully led training sessions for 3+ junior** resources, enhancing their business analysis and agile skills.
- Proficient in business analysis tools and methodologies, including **JIRA, Confluence, and UML**, with a keen focus on continuous learning and process optimization to support business goals and enhance product quality. Committed to delivering business value and fostering innovation through data-driven decision making.

WORK EXPERIENCE

Business Analyst | Brane Enterprises | Jul' 2023 - Present

Key Result Areas:

- Engaging with business stakeholders to capture and prioritize requirements based on business value for healthcare and life sciences clients, taking full ownership throughout the process.
- Leading requirement elicitation through workshops, interviews, focus groups, document analysis, questionnaires, brainstorming, interface analysis, and prototyping.
- Documenting detailed business needs into clear User Stories, BRDs, FRDs, Use Cases, functional specifications, wireframes, workflow diagrams, and flowcharts.
- Collaborating with development and testing teams to assess requirement feasibility, clarify doubts, and estimate effort for effective sprint planning and backlog grooming.
- Managing product and sprint backlogs, allocating tasks within Agile teams using Azure DevOps and JIRA, ensuring smooth sprint execution.
- Defining functional specifications and acceptance criteria for User Requirements and Product Backlog Items, overseeing proper implementation.
- Coordinating with QA teams to facilitate internal testing and validate requirements during bi-weekly sprint demos, while addressing feedback from sprint retrospectives.
- Handling risk analysis, CAB deliveries (RFCs), requirement prioritization, test case reviews and functional bug/incident analysis reported by clients.
- Supporting clients during UAT, preparing process specifications including Definition of Done (DoD) and Definition of Ready (DoR).
- Designing business models using Bizagi Modeler and creating mockups/wireframes with Balsamiq and MS Paint, supplemented by diagrams in MS Visio.
- Providing techno-functional support by coordinating with development teams & assisting end users through backend management using SQL queries to resolve issues.
- Interpreted mock-ups and business process models using Bizagi Modeler, facilitated whiteboarding sessions, and designed tailored solutions to meet project needs.
- Drove MVPs and Product Backlog Items (PBIs) to meet tight deadlines while actively participating in backlog grooming and sprint planning with the engineering team.
- Developed and refined sprint requirements and coordinated bug fixes pre-release to ensure high-quality deliverables.
- Estimated story points accurately using Planning Poker and supported Business Analysts by identifying relevant non-functional requirements.
- Analyzed all possible use cases and validated acceptance criteria throughout development to prevent regression issues.
- Managed change management processes, handled change requests and communicated bug fixes effectively to stakeholders.

Result-driven Business Analyst with experience in healthcare, pharmaceuticals and life sciences domains. Skilled in requirement elicitation, process modeling & Agile project management, seeking to leverage analytical expertise and strong stakeholder collaboration to drive impactful business solutions and deliver value-driven outcomes in a dynamic environment.

PREVIOUS WORK EXPERIENCE

Business Analyst Trainee | Mindgate Solutions Pvt. Ltd. | Jun' 2022– May' 2023

Key Result Areas:

- Collaborated with the NETC Fastag Product Team to gather client requirements and facilitate knowledge transfer.
- Prepared comprehensive documentation, including Functional Specifications and Business Requirement Documents.
- Conducted in-depth research & delivered presentations to stakeholders for requirement approvals.
- Supported the team by providing impact and gap analysis for seamless integration of customer on-boarding features.
- Facilitated effective communication between Technical Teams and Business Clients to manage project lifecycles.
- Prepared detailed documentation to clarify business goals and drive improvements.
- Conducted sessions to clarify business goals and drive improvements.
- Managed project lifecycles to ensure timely delivery and improve team productivity.

PROJECT EXPERIENCE

Project @ Brane (QMS- Quality Management System)

- Worked on the Eurofins Labs Quality Management System (QMS) project, integrating 5 key modules: Customer Registration, Billing, Sample Registration, Sample Analysis and Reporting.
- Managed end-to-end processes for registering and testing diverse samples such as soil, food, water, and salmon fish, aligned with customer priorities.
- Analyzed and validated sample measurements, ensuring accurate processing of results within the Sample Analysis module.
- Implemented and updated critical client requirements worldwide, focusing on enhancements in Result Entry and Test Validation interfaces.

NETC FASTag | Duration: 9 Months

- Played a pivotal role in developing the NETC system, a digital platform by NPCI for automated toll management, reducing congestion & promoting cashless transactions.
- Collaborated with clients to gather requirements, created detailed documentation, and facilitated communication between technical teams and business stakeholders.

Wockhardt | Duration: 5 Months

- Supported Wockhardt's digital transformation by designing user-centric interfaces and improving system functionalities to deliver advanced digital healthcare solutions.

GMR Airport | Duration: 6 Months

- Assisted in optimizing the application interface for GMR Hyderabad Airport, enhancing user experience and ensuring alignment with business requirements.

Knowledge Management | Duration: 6 Months

- Developed an internal search tool on the NSLHUB platform, similar to Google Search, enabling users to access FAQs and Knowledge Base Articles independently, reducing bug reports and improving operational efficiency.

SALUD Interactiva | Duration: 4 Months

- Contributed to UI/UX design for digital healthcare applications, creating interactive and user-friendly interfaces that improved patient engagement and management.
