

GEETANJALI BANDARU

Mail- geeet.anjali.2301@gmail.com **Phone-** +91 9100965665

OBJECTIVE

A motivated final-year undergraduate in Computer Science with a specialization in Data Science from GRIET, Hyderabad, seeking an entry-level position to apply and expand technical and analytical skills in a collaborative environment. Passionate about solving real-world problems using Python, Tableau, and Excel, with a strong foundation in data analysis and visualization. Dedicated to continuous learning, professional growth, and making a meaningful impact in the fields of data science and finance.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology - Hyderabad, India	2021 - 2025
Bachelor of Technology in Data Science	CGPA: 7.5
Sri Chaitanya Institutions - Hyderabad, India	2019 - 2021
Grade 11 & 12 TSBIE	91.4%
Rosary Convent High School - Hyderabad, India	2018-2019
Grade 10 SSC	CGPA: 9.2

SKILLS

- **Programming Languages:** Python, R, SQL, DBMS
- **Development Tools:** Jupyter, Google collab
- **Data Analysis and Visualization:** Excel, Tableau, R/Visualization Tools, Power BI, Data Cleaning, Power BI
- **Machine Learning & AI:** Machine Learning, AI Tools
- **Soft Skills:** Problem-Solving, Critical Thinking, Adaptability, Communication, Networking Skills

ACADEMIC PROJECTS

Brain Tumor Classification using Deep Learning (Mini Project)

- Developed a web-based chatbot using Python, Flask, and HTML to provide instant information on admissions, departments, and campus facilities.
- Integrated NLP algorithms to understand and respond to user queries, automating repetitive administrative tasks.
- Designed a responsive, user-friendly interface to enhance real-time student engagement and reduce manual workload.

College Enquiry ChatBot for GRIET (Major Project)

- Developed a deep learning model using CNNs to classify brain tumors from MRI scans, achieving high accuracy across tumor types.
- Preprocessed medical images with grayscale conversion, normalization, and resizing for optimal model performance.
- Evaluated model accuracy by comparing CNN results with SVM, gaining hands-on experience in medical image analysis and model evaluation.

IoT-Based Water Quality Monitoring using ESP32 (Major Project)

- Designed a real-time water quality monitoring system using ESP32 and IoT, integrating TDS, turbidity, and temperature sensors.
- Developed a prototype that transmits sensor data via Wi-Fi, enabling remote monitoring and environmental data analysis.
- Focused on a low-cost, scalable solution for rural areas, promoting sustainability and public health.

CERTIFICATIONS

- Certification in User-centric computing for human computer interaction (NPTEL).
- Certification in Introduction to Internet of Things (NPTEL).
- Certification in Data Visualization with R programming (IBM).
- Certification - Deloitte Data Analytics Job Simulation.
- Certification - Data Analyst Skill Certification Test.

LANGUAGES

- English
- Telugu
- Hindi

EXTRACURRICULARS

- Volunteer for Tech events in campus.
- Coordinator for sports events.
